INAUGURAL ADDRESS
OF
HON. ARTHUR N. HARRIMAN
MAYOR OF NEW BEDFORD
MASSACHUSETTS
TO CITY COUNCIL
JANUARY 3, 1949

AMERICAN PRESS

INAUGURAL ADDRESS
OF
HON. ARTHUR N. HARRIMAN
MAYOR
TO CITY COUNCIL

January 3, 1949

Mr. President, Members of the City Council,
My fellow citizens

As one year is drawn to a close and another has begun there ought to be not only a stock taking of what has taken place in the last twelve months but as well to consider what the ensuing twelve months may bring.

The problem of the continuance of boat service between New Bedford and the islands was, and is, of vital importance to the port of New Bedford.

At the first of the year it had become apparent that the private interests which were in control of the steamship line could not maintain suitable passenger and freight traffic from New Bedford to the islands.

The continuation of this kind of service was of vital interest not only to New Bedford but to the islands themselves.

After much investigation, legislation was passed which provided avenues for the state to take over, maintain and operate this boat line.

It was obvious, of course, that under state ownership the city would lose the tax revenue of the wharf and of the property owned by the line in New Bedford.

It was also agreed that should there be a deficit in the operation, under state control, that the deficit would be made up as follows:—

10% by Falmouth
25% by Nantucket
50% by Dukes County
15% by the City of New Bedford

and it would seem that, under these circumstances, it not only would be proper but necessary for the City of New Bedford to agree.

A law was finally enacted by the legislature and it is hoped that this service will be continued with efficient management and without a deficit.

However, the city should be mindful and ever vigilant and see to it that under the new management New Bedford should still, as now, be the home port of the steamship line.

The city has already taken steps to assure the acquisition of Fort Rodman as city property if, and when, it is relinquished by the government. Its present status is uncertain but there will be no relinquishing of the city's efforts to secure final ownership.

In 1947, at the time of the discontinuance of the street trolley service, the city borrowed inside the Debt Limit \$300,000. to cover the tracks.

The work of recovering these tracks was carried on in 1947 and 1948 and 18.944 miles of highway were resurfaced.

There remains several miles of uncovered trackage and I propose to submit an order providing for the borrowing of \$250,000. inside the Debt Limit to be used for this same purpose.

During the year a boiler has been installed in the Vocational High School and three furnaces have been rebuilt at the Incinerator Plant.

One new pumper was added to the Fire Department as were two new aerial trucks.

If, and when, Sassaquin Avenue is accepted then it will be possible for the city to lay pipes for water service and I shall submit to the City Council, at the proper time, an appropriation of funds for that purpose.

I am informed, by the Engineers who have the matter in charge, that bids will be advertised for the Intercepting Sewer within a few weeks. This is made necessary because no bids were received under the first advertisement in November.

During the year additional land was secured for the extension of the Airport area and with the exception of a very small piece, which it may be well to acquire, it would seem that these acquisitions will be sufficient.

An ILS system was installed by the government at no cost to the city other than the building of a dirt road.

The Airport also obtained a Snow-Go and several other pieces of machinery from the government at practically no expense to the city.

A contract has been awarded, by the Airport Commission, for engineering services in connection with the preparation of a master plan preliminary to the application for funds, to the Federal Government, for an Administration Building and other improvements at the Airport.

The cost of these improvements, when approved by the government, will be shared in part by the Federal Government, the State Government and the City of New Bedford.

The increased costs, over which the city has no control, will be noticeable in the budget which will be submitted to you, and whatever increase in the tax rate may be necessary, you may be assured that every effort will be made to hold it to the lowest possible rate.

During the past six years there have been many problems — Problems of War and Problems of Peace, and we are finding a condition which was to be expected — that the Problems of Peace are as exacting and vital as were the Problems of War.

You and I do not know exactly what the future holds but we do know that there is a strain being put upon our economy and that when headed for stormy waters the wise and prudent mariner reefs his sails.

The cost of public assistance is constantly increasing and it will be greater should we enter into a period of unemployment.

So far as legislation is concerned affecting the cities and towns it might well be noted that the Mayors' Club has introduced a bill providing that 25% of the gasoline tax be diverted to cities and towns for highway work within their own boundaries. Should this be approved by the legislature it would somewhat lessen the burden, inasmuch as it would reduce the amount made necessary to operate the Highway Division whose funds would be derived from taxes.

The financial condition of the city is good although continued care and prudence must be taken, as always, in the expenditure of the city's funds.

Every effort, of course, must be made to provide sufficient services to the citizens with the knowledge that they are to receive a dollar's worth of services and goods for every dollar taken from them in taxes.

In this, as in other years, the services that have been rendered by City Officials and employees have been such that I can add my word of appreciation and thanks for their cooperation.

We can sometimes learn much from the wisdom of men who have gone before and with this thought in mind I quote from the "Spirit of the Laws"—

"The principle of democracy is corrupted, not only when the spirit of equality is extinct but likewise when it falls into a spirit of extreme equality; and when every citizen wants to be upon a level with those he had chosen to command him.

"Then the people, incapable of bearing the very power they have intrusted, want to do everything of themselves, to debate for the senate, to execute for the magistrate, and to strip the judges.

"When this is the case virtue can no longer subsist in the republic. The people want to exercise the functions of the magistrates, who cease to be revered. The deliberations of the senate are slighted; all respect for the senators is then laid aside and consequently for old age. If there is no more respect for old age there will soon be none for parents.

"This licentiousness will soon taint the mind: and the restraint of command will be as fatiguing as that of obedience.

"The people fall into misfortune when those in whom they thrust, desirous of concealing their own corruption, endeavor to corrupt. To prevent them from seeing their own ambition, they speak to them only of their grandeur; to conceal their own avarice, they incessantly flatter theirs.

"The corruption will increase among the corruptors, and likewise among those who are already corrupted.

"The people will distribute the public money among themselves, and having added the administration of affairs to their indolence, they will be for adding to their poverty the amusements of luxury. But with their indolence and luxury nothing but the public treasure will be able to satisfy their demands.

"It is impossible to give a great deal to the people without squeezing a great deal more out of them. "The greater the advantages they seem to derive from their liberty the nearer they draw to the critical moment of losing it.

"Petty tyrants arise, who have all the vices of a single tyrant.

"The small remains of liberty soon become insupportable; a single tyrant starts up, and the people lose all, even the advantages of their corruption.

"Democracy has therefore two excesses to avoid: the spirit of inequality which leads to aristocracy or monarchy; and the spirit of extreme equality, which leads to despotic power as the latter is completed by conquest."

These were the wise words of Montesquieu and were written two hundred years ago.

So, with a knowledge of the past and appreciation of the principles of government and morality that are necessary to establish and maintain a government of free men, we can well ask ourselves today if we value freedom less than did those of a century ago and has increasing materialism led all too many people to think of individual freedom as a right and an opportunity to make as much money as they can by any means that they see fit.

The founders of our republic were, in the main, men of deep convictions as well as political acumen.

So we recognize in spiritual freedom our birthright and realize that we ought to use it — eagerly, confidentially and intelligently to serve our neighbor as well as ourselves.

The challenge of today is the challenge of tomorrow.

We must not look mournfully into the past — for the past will not come back, but instead we must improve the present — it is ours.

Let us go forward together into the shadowy future, but with Hope, Courage and Faith; Faith in ourselves, Faith in our system of Government and Faith in God.

SUPERINTENDENT AND INSPECTOR OF BUILDINGS

ANNUAL REPORT

1948

In accordance with Chapter 7 Section 158 of the City Code of the City of New Bedford, I hereby submit a report of the activities of the Superintendent of Buildings for the calendar year of 1948.

BUILDING DEPARTMENT

During the year 1948 the Building Department issued 1323 building permits for the work estimated by the applicants to cost Two million, four hundred and nine thousand, one hundred and fifty dollars (\$2,409,150.00).

The year 1948 compares very favorably with the years 1947 and 1946. While the number of permits issued in 1948 was only slightly higher than the number issued in 1947, the estimated cost of the work exceeded the cost of the work in 1947 by Sixty-one thousand eighty-five dollars (\$61,085.00).

Several permits were issued during the year to the Hathaway Mfg. Co. for additions and alterations, which were estimated to cost approximately One hundred eight thousand, two hundred dollars (\$108,200.00), which was the largest expenditure for Industrial property.

The addition to the Sacred Heart Home which was estimated to cost One hundred thousand dollars (\$100,000) was the largest expenditure among the miscellaneous types of buildings.

Some of the larger projects for which permits were issued are as follows:

Acushnet Process Co.	\$25,000.00
Acushnet Process Co.	35,000.00
E. Anthony and Sons	38,000.00
Bay State Broadcasting Co.	20,000.00
Better Homes Inc.	35,000.00
Continental Screw Co.	50,000.00
Cornell-Dubilier Elec. Corp.	22,000.00
Maynard A. Davis	11,000.00

Florence A. Dobson	12,000.00
L. S. Eldredge and Son, Inc.	20,000.00
Goodyer Tire & Rubber Co.	20,000.00
Hathaway Mfg. Co.	32,000.00
Hathaway Mfg. Co.	14,000.00
Hathaway Mfg. Co.	14,000.00
Louis Herman	50,000.00
Frederick Jones	10,000.00
Kenmore Realty Co.	60,000.00
Anne L. Mulligan	10,000.00
Nashawena Mills	60,000.00
New Bedford Buick Co.	32,500.00
Paramount Business Exchange	12,000.00
Jack & Ethel Robinson	14,000.00
Albert L. Roderiques	12,000.00
Sacred Heart Home	100,000.00
David J. Stratton	10,000.00
Swain School of Design	60,000.00
Wamsutta Mills	25,000.00
Wamsutta Mills	14,000.00
Israel Yarchin	18,000.00

SUMMARY OF BUILDING PERMITS

1948

	Permits	Estimated Cost
*New Construction	330	\$1,154,870.00
**Alterations and Additions	677	970,580.00
Heating	266	283,700.00
Demolitions	50
Total	1323	\$2,409,150.00

*NEW CONSTRUCTIONS:

Dwellings	146	\$ 688,900.00
Filling Stations	6	45,500.00
Stores	4	25,500.00
Business & Mfg.	17	215,500.00
Garages	79	138,925.00
Miscellaneous	78	40,545.00
Total	330	\$1,154,870.00

**ALTERATIONS AND ADDITIONS:

Dwellings	465	\$ 298,820.00
Business	164	547,275.00
Miscellaneous	48	124,485.00
Total	677	\$ 970,580.00

Comparative Summary of Construction for the last Five Years:

Year	No. of Permits	Estimated Cost
*1944	1592	\$ 786,055.00
1945	1090	807,917.00
1946	1326	2,241,579.00
1947	1311	2,348,065.00
1948	1323	2,409,150.00

*The 1944 permits included permits issued in connection with Hurricane Damage.

During 1948, the Department made 157 special investigations. These were the results of complaints that were filed, or for the purpose of assisting some property owners who desired information relative to making changes in existing property.

In 1948, the Building Department approved the construction sketches, site of location, and the method of erection and maintenance of two hundred and twenty-one signs.

The Massachusetts state law requires that a thorough yearly inspection be made of all elevators, and reports of their condition made to the State Public Safety Department.

During the year 1948, there were 354 elevators inspected, and written reports sent to the Commissioner of Public Safety.

There were 9 new elevators installed during the year:

5.....	Freight
4.....	Passenger

There were 4 electric Stairways installed.

Elevator operator's licenses granted during the year were one hundred and six. Of this amount, eighty-eight were renewals, and eighteen were originals. An operator's

license is granted after the applicant successfully passes an operating examination given by an inspector of this department.

In 1948 there were 85 appeals from the rulings of the Inspector of Buildings relative to the application of the zoning ordinances.

The Appeal Board has been very lenient, and has made every effort to legally grant these requests for changes.

Granted*	68
Denied*	12
Withdrawn	5
	<hr/>
	85

There were 4 cases relative to the Building Code:

Supt. decision reversed	2
Supt. decision sustained	2

*Appeals that are granted are reversals of the rulings of the Inspector of Buildings, while appeals denied upheld the Inspector's ruling.

In accordance with Chapter 143 of the General Laws as amended, every building or part thereof, used as a place of public assembly and capable of accommodating 50 or more people, or where 10 or more people are employed, rooming houses and apartment houses having eight rooms or 10 people above the second floor, must be carefully examined and a certificate issued by this department, before a license for the use of the same can be obtained.

During the past year, the department has checked and issued certificates for the following new places of assembly:

Clubs	5
Halls	9
Restaurants	1
Bowling Alleys	1
Industrial Plants	33
Office Buildings	3

There were 36 letters written to the above Places of Assembly calling their attention to the necessary alterations and additions required in order that the premises would comply with the law.

Thirty-three hotels and lodging houses were inspected during the year, a total of 850 rooms. A report of each inspection was forwarded to the Commissioner of Public Safety of Boston, Massachusetts.

BUILDING MAINTENANCE

The Building Maintenance repair men are called upon for many kinds of service. After completing the alterations to the Isolation Hospital, which were started in 1947, the men shifted over to the City Infirmary and made extensive repairs to the barn, piggery and all out buildings. Each and every building was repaired and painted.

Two of the Women's wards were replastered and painted, as were the Men's Hospital and Recreation Room.

A new boiler with an oil burner was installed at the Oak Grove Cemetery Greenhouse.

A new boiler was also installed at the #5 Police Station.

Work was also started and considerable progress made in repairing a part of the former Butler Mill Property which is to be the new headquarters and work shop for the Maintenance crew.

Miscellaneous Repairs:

Center Library
City Infirmary
Center Police Station
North End Police Station
Municipal Building
North End Comfort Station
South End Comfort Station
Mary B. White School
Park Department
Water Department
Wharfinger Building
Isolation Hospital
Veteran's Administration Building

BERENICE E. IRVING

Clerk of the Cemetery Board.

BOARD OF CEMETERY COMMISSIONERS

To the Honorable Mayor and City Council
New Bedford, Mass.

On March 25, 1948 the unsold portion and avenues in the Peckham West Cemetery were accepted by the City Council and turned over to this department making four active operating cemeteries under the jurisdiction of this Board. To the best of our knowledge no records as to where interments were made on lots in this cemetery were kept except those kept by individual lot owners. It would be a stupendous task and we believe an impossible one to obtain accurate records because owners have sold and re-sold lots and parts of lots. However, when new lots are sold, certificates will be issued and records kept, the same as in our other cemeteries and all will come under our rules and regulations.

A new law was enacted June 11, 1948 effective September 9, 1948 whereby the Cemetery Board was required to turn their certificate books of cemetery lots over to the City Clerk. This law makes it mandatory for a lot owner to pay \$1.00 for recording certificates and all subsequent certificates.

The monies made available to us from the Sales of Lots Fund greatly improved some of our avenues and enabled us to do much needed work but we still have much more work to do before our cemeteries will be up to the standard they should be. We also embellished our various cemeteries by planting shrubbery and this coming year we hope to have enough monies made available to continue this work.

During 1948 this department paid out \$2,042.31 for sick leave.

We purchased a lowering device, grass sets, new Ford Truck and motor mowers during the last year.

Certificates were issued for sixty lots, fifty-four graves and thirty-five transfers of lots. Fifty lots were put into perpetual care making a total of 3,739 lots that are now under this account.

Respectfully submitted,

ROBERT CROMPTON, Chairman

WILLIAM A. BRIGHTMAN

ROBERT S. WEAVER, Secretary

SUPERINTENDENT'S REPORT

To The Board of Cemetery Commissioners:—

Gentlemen:—

In the year of 1948 much progress was made in our cemeteries. About 22,000 square yards of our avenues were black topped with "warrenite" and nearly five hundred shrubs were planted in three of our cemeteries.

Much improvement has been made in our newly acquired Peckham West Cemetery. The part facing Mt. Pleasant Street, which was in a deplorable condition, has been cleaned up, graded and seeded. Lots in this cemetery will be available soon.

A new boiler was installed and equipped with an oil burner in the greenhouse at the Oak Grove Cemetery. This will practically eliminate the need of night work for the employees of the greenhouse.

The office buildings at the Oak Grove and Pine Grove cemeteries were painted.

In being able to purchase several motor driven lawn mowers we kept the grass on our perpetual and annual care lots in a much better condition but we need some larger type mowers to keep our city property and unsold sections in a presentable condition. These sections spoil the effect of our efforts to have our cemeteries look beautiful but we cannot do so with our present equipment.

Many of our avenues need top coating and I recommend doing some of them each year until they are all completed. In the old part of Rural Cemetery there are several dirt avenues which require much labor to keep them free of weeds which could be eliminated by this process.

A rose garden was started at the Oak Grove Cemetery this year and in 1949 we hope to extend it. We plan to have many more beautiful flower beds in 1949.

The office building at Rural Cemetery should be painted this coming year.

The house on Parker Street is in need of extensive repairs and needs painting. If this work is not done the house should be disposed of.

I still strongly recommend the use of cement crypts in our cemeteries as they will save the department considerable labor and the lot owners the expense of fitting sunken graves.

The following is a summary of general work done in 1948:—

CEMETERY BOARD

111

SUMMARY OF WORK DONE IN 1948

	Rural	Oak Grove	Pine Grove	Peck- ham West
Lineal ft. borders trimmed	30,770	2,627	6,770	2,080
Foundations for tablets and markers...	112	13	54	2

CEMETERY BOARD

REPORT OF CARETAKER

OF

SOLDIERS' AND SAILORS' GRAVES

New Bedford, Mass.

January 1, 1949

To The Honorable City Council of the
City of New Bedford

Gentlemen:—

I hereby submit the following report of the work done on neglected lots and graves where soldiers and sailors are interred, as authorized in Chapter 218, Acts of Legislature, 1920:—

	Care of Lots and Graves	
Rural Cemetery	178	
Oak Grove Cemetery	163	
Pine Grove Cemetery	18	
Peckham West Cemetery	13	
Sacred Heart Cemetery	31	\$20 was expended
Jewish Cemetery	29	for fitting graves.
Congregational Church Cemetery	2	
Griffin Street Cemetery	6	
	<hr/> 440	

The amount appropriated for this work was \$1,950 and of this amount \$1,927.01 was expended for cutting grass and \$20 for fitting graves, making a total of \$1,947.01 and leaving a balance of \$2.99.

Respectfully submitted,

WALTER F. SMITH

Caretaker of Soldiers' and Sailors' Graves

Exhibit J—Schedule showing year of maturity for Bonded Debt and Sinking Funds as of December 31, 1948.

Exhibit K—Comparative Balance Sheets as of December 31, 1947 and December 31, 1948.

My audit of Cash in Banks as of December 31, 1948 disclosed balances totaling \$1,497,785.20 a decrease of \$468,284.16 in comparison with the beginning of the year.

Taxes Receivable at the close of the year were \$330,747.46 against \$355,785.14 on December 31, 1947, a decrease of \$25,037.68.

Tax Titles on December 31, 1948 amounted to \$61,749.73 an increase of \$18,923.25 in the balance shown on December 31, 1947.

On December 31, 1948 Bonded Debt Outstanding totaled \$2,341,000.00 against \$2,796,000.00 at the close of the previous year. This is a net reduction of \$455,000.00. Bonds outstanding and payable by the City of New Bedford are listed in detail on Exhibit F.

During the year the City of New Bedford borrowed \$1,800,000.00 in Notes Payable for Temporary Revenue Loan, this obligation was paid during the fiscal year ended December 31, 1948.

Exhibit H shows the Bonded Debt for the City of New Bedford for each year commencing in 1928 through 1948. At the close of the year 1928 bonded debt totaled \$12,225,000.00, the highest point reached during the past twenty years and at the close of the year 1948 this indebtedness has been reduced to \$2,341,000.00.

Exhibit J sets forth the net amount payable yearly from revenue to provide for payments against bonded debt outstanding at the close of the year 1948. These requirements total \$374,000.00 for the fiscal year 1949 and show substantial decreases each year with final payment liquidating all bonded debt during the year 1967.

All receipts and expenditures for the fiscal year ended December 31, 1948 are shown in detail on Exhibit B and C. Total receipts included money borrowed totaled \$12,952,126.06 while expenditures totaled \$13,378,539.47.

The City of New Bedford closed the fiscal year 1948 with a surplus of \$732,379.29 in the Excess and Deficiency Account after transferring \$439,401.00 for departmental appropriations.

Exhibit K shows a comparison of assets and liabilities at the beginning and end of the fiscal year ended December 31, 1948 setting forth the increase or decrease in each amount.

I certify that in my audit of the books and records of the City of New Bedford I verified cash on deposit and securities representing the investment of sinking funds of the City of New Bedford and several trust funds in the custody of the Commissioners, trustees and city treasurer and find the same is in agreement with reports and records rendered by said commissioners, trustees and city treasurer to the City Council.

Respectfully submitted,

EDWARD F. NERBONNE

City Auditor

	<hr/>	
Increase over last year	\$1,987.01 *	

* This Amount includes increase in Salaries and Wages of \$1,103.24

The preceding figures dealing with the financial transactions of this office are extremely illuminating when read with an eye toward the services offered the general public by the City Clerk's Office. You will note that financially this office shows a gain of \$4,068.34 over the 1947 receipts. Last year our financial receipts were \$24,503.23 above those for the year 1939. A portion of this increase may be attributed to increased fees, but it in a great degree reflects additional services rendered. The greatest individual monetary gain will be noted in fees paid for scallop licenses. This is due to four principle factors; first, the enactment of a new set of rules and regulations by the City Council with the approval of the Mayor in October, 1948; second, an increase in commercial fees from \$1.00 to \$5.00; third, the appointment of a shellfish warden; fourth, the abundance of scallops in 1948. You will note that we took in \$537.00 additional for petroleum registrations which was mainly due to an increase in fees, and \$218.00 for petroleum licenses resulting from an increase provided for by an ordinance enacted by the City Council March 11, 1948. Our fees for copies

of vital statistic records increased \$340.00. Since there were 214 less marriage intentions filed in 1948 our revenue from this source decreased \$428.00. Receipts from Sunday entertainment licenses were \$654.00 less than in 1947. While none of these figures are stratospheric, one must remember that no one is compelled to pay nor are we allowed to charge substantial fees for our services. While it is not the basic function of this office to produce revenue nevertheless, whatever we take in is definitely a credit against the funds necessary to operate the municipality.

CITY COUNCIL

Councillor Ovila Fortin was elected President of the City Council for the year 1948. The Council held 20 regular meetings, 14 special meetings, one meeting sitting as a Committee of the Whole, and one meeting with the Mayor as Board of Mayor and City Council. The annual budget in the amount of \$8,458,048.41 was received from Mayor Arthur N. Harriman on January 8, 1948, and was adopted the same day.

ACCEPTANCE OF LEGISLATIVE ACTS

On April 22, 1948, the city council accepted the provisions of Chapter 222 of the Acts of 1948, entitled "An Act Temporarily Relaxing the Terms of Ordinances or By-Laws Restricting the Use and Occupation of Two and One-Half Story Houses, so-called", which action was approved by the Mayor on April 24, 1948.

On May 27, 1948, the city council accepted the provisions of Chapter 44 of the Acts of 1948, entitled "An Act Establishing the Date for the Holding of the Biennial Municipal Election in the City of New Bedford" which action was approved by the Mayor on May 29, 1948.

On August 19, 1948, the City Council accepted the provisions of Chapter 588 of the Acts of 1948, authorizing increases in amounts of pensions of certain former public employees, which action was approved by the Mayor August 27, 1948; an order ratifying the order accepting the provisions of this Act was adopted by the City Council September 16, 1948 and approved by the Mayor September 20, 1948.

ORDINANCES

Aside from innumerable traffic and zoning changes, the outstanding legislative enactments during the year were as follows:

1. On March 25, 1948, an ordinance entitled, "An Ordinance Establishing Fees in Connection with the Keeping, Storage or Sale of Petroleum Products, under Provisions of Section 13, Chapter 148 of the General Laws," was enacted. This new fee schedule brought us in line with other cities of comparable size.
2. After extensive study by the City Council Committee on Shellfish, and upon recommendation of said body, the City Council on October 14, 1948, adopted a new set of Rules and Regulations for the Taking of Shellfish.

These supplanted the prior regulations which had not been revised since 1926. This legislation was most opportune as a bumper crop of scallops was available in New Bedford waters in 1948. It is interesting to note that 424 commercial scallop licenses were issued in 1948 as against 47 in 1947. We also issued 198 free licenses for family use only.

3. Because of the high handed methods used by some fishermen who resented the presence of so many new operators, it became necessary to provide drastic measures for a proper regulation of the industry, and the City Council accordingly enacted on October 14, 1948, an Ordinance Entitled, "An Ordinance Providing Penalties Relative to the Taking of Shellfish."
4. The regulation of traffic by the employment of parking meters has come to be the accepted mode throughout the country, and in keeping with the national trend, the City Council on December 9, 1948, adopted an ordinance providing for the acquisition, installation and maintenance of this type of traffic control.
5. On January 13, 1949, the City Council passed an ordinance over the veto of the Mayor, which provided for payroll deductions for the payment of premiums under a master policy or policies issued to an association of municipal employees. This ordinance had been passed to be ordained by the city council originally on December 9, 1948.

BOARD OF SURVEY

This board, which consists of the Mayor and members of the City Council under the authority of Chapter 271 of the Acts of 1914, held five meetings during the year 1948.

ELECTIONS

During the year 1948 three elections were held.

At the Presidential Primaries held on April 27, 1948, a total vote of 3900 was cast out of an enrollment of 56,397, or approximately 6.91% of the registered voters.

At the State Primaries held on September 14, 1948, a total vote of 17,699 was cast out of an enrollment of 55,612, or approximately 31.83% of the registered voters.

At the Biennial State Election held on November 2, 1948, a total vote of 51,955 was cast out of an enrollment of 59,741, or approximately 86.97% of the registered voters.

At sessions of the Board of Registrars of Voters held in the City Council Chambers, Municipal Building, on November 16 and 17, 1948, a recount was held of the votes cast for Representatives, 7th Bristol District, comprising Wards 3—4—5; and also of the votes cast for the office of District Attorney.

GENERAL

The foregoing pages in a minor degree reflect the multiple duties of the city clerk's office. In addition, however, it acts as a clearing house, a record room, and an information bureau of the city government. During the past year we have as usual been in personal contact with thousands of persons, and because I appreciate our responsibility to build good will for the city, extreme care has been taken to ensure fast, efficient and courteous treatment to all such visitors. The entire staff in my office is fully aware of our status, namely, to act as the logical link between the public and the municipal administration, and have conscientiously performed their duties.

The audit of the accounts of the City of New Bedford for the period from March 1, 1947 to May 17, 1948, was

CITY CLERK'S REPORT

**LAW DEPARTMENT
ANNUAL REPORT
1948**

August 17, 1949

To the City Council

Gentlemen:

There is submitted herewith the annual report of the Law Department for the fiscal year ending December 31, 1948.

During the year 1948 this office rendered 29 written opinions and many informal opinions to the Mayor, City Councillors and various department heads.

We have drafted, examined and approved many contracts, deeds, leases and other instruments.

During the year 163 industrial accident cases were disposed of and reports made to the Industrial Accident Board. This office has also handled a great variety of claims against the City.

There is attached hereto a list of the suits which were pending in favor of and against the City of New Bedford December 31, 1948,—

ANNUAL REPORT
OF THE
CHIEF
OF THE
FIRE DEPARTMENT
NEW BEDFORD, MASSACHUSETTS

FOR THE YEAR ENDING DECEMBER 31, 1948

Milton C. Andrews, Chief of Department

FIRE DEPARTMENT REPORT

December 31, 1948

Hon. Arthur N. Harriman, Mayor

Dear Sir:

I have the honor to submit, herewith, my second annual report of the conditions and operations of the Fire Department for the year 1948.

The Department answered 260 Box Alarms and 883 Still or Telephone Alarms, a total of 1143 calls during the year. 70 False Alarms were sounded during the year, of which 65 were False Bell Alarms and 5 were False Still Alarms. In addition, 97 service calls with apparatus were made, a few of the reasons for such calls being as follows:- Flushing gasoline or kerosene from streets, opening locked doors where children were locked in or where food was cooking on stoves; spraying water on hen houses during the hot spells; cooling stuck draw bridge; renewing flag pole halyards at schools; removing dangerous icicles; and, using inhalator on gassed persons.

The Assistant Superintendent of Fire Alarm reports considerable progress this year. Ten of the latest type fire alarm boxes have been installed, replacing some that are very old and obsolete. All boxes in the city were tested, inspected and checked three times during the year. 150 boxes and pedestals were repainted. Nearly two-thirds of a mile of fire alarm cable was placed underground in the Brock Avenue area, and overhead wiring was taken down there. The Fire Alarm Branch has a manual force of eleven.

The Chief Inspector of the Fire Prevention Bureau and his assistant made approximately 4,000 inspections during the year. Permits were granted as follows:

Power Oil Burners	819
Range & Cabinet Oil Burners	208
Fuel Oil Storage	68
Garage & Filling Stations	25
Liquified Petroleum Gas	11

The manual force in this division consists of the Chief Inspector, a Captain, and 2 clerks.

The Master Mechanic in charge of the Repair Shop, with a crew of four assistants, reports completing approximately 700 repair jobs during the year, such as overhauling of fire apparatus, adjustments to apparatus and fire equipment, painting, repairing fire hose, nozzles, batteries, ladders and the numerous tools and appliances carried on apparatus. There are 33 motor vehicles to be kept in good running condition; also, 12 brick fire stations and 1 wood frame building in our custody, requiring considerable repair work both inside and outside.

The six District Chiefs made approximately 600 inspections during the year, investigating complaints and remedying hazardous conditions, combined with their usual routine duties of taking command on fire responses, visiting stations, and keeping affairs running efficiently in their respective districts.

During the year, a new Aherns-Fox 1,000 gallon Pumper was installed at the Central Fire Station to replace an engine that is 32 years old and which is now used as a reserve engine; a new Seagrave 75 ft. Aerial Ladder Truck was placed in commission at Fire Station No. 6 to replace an old electric battery truck that is 31 years old; a new Ford automobile for a District Chief was obtained; 1900 Ft. of 2½" Fire Hose was purchased as was 1350 Ft. of 1½" Fire Hose; 1 Gasoline-Driven Electric Generating Unit with Floodlights was obtained; 10 new Fire Alarm Boxes, 2 Life Nets, 1 Eastman-Barker Deluge Gun and 2 Aerial Ladder Pipes were also obtained.

APPARATUS IN COMMISSION

- 8 Motor Pumping Engines
- 1 Gasoline-driven Aerial Ladder Truck
- 2 Electrical Aerial Ladder Trucks
- 1 City Service Truck
- 2 Hose Wagons with Booster equipment
- 1 Fog Firefighter
- 1 Hose Wagon equipped for Forest Fire Service
- 6 Automobiles for Chief and Assistants
- 1 Automobile for Fire Prevention Bureau
- 1 Automobile for Master-Mechanic
- 2 Supply trucks for Repair Force

- 1 Wrecking Car for Repair Force
- 1 Supply truck for Fire Alarm Bureau

APPARATUS IN RESERVE

- 3 Motor Combination Pumping Engines
- 1 Reserve Truck equipped with Skid Pump
- 1 Protective Society Salvage Wagon

MINOR EQUIPMENT

- 8 Trailer and Skid Pump units at various stations
- Assortment of pump cans, ladders, axes, etc.

HOSE

- 550 feet of 3 inch.
- 26,000 feet of 2½ inch.
- 6,250 feet of 1½ inch.
- 500 feet of 1 inch High Pressure Hose.
- 1,650 feet of ¾ inch Booster Hose.
- 137 Waterproof Covers carried on apparatus.

RECOMMENDATIONS

I again recommend the purchase of two new aerial ladder trucks to replace the two remaining electric battery aerial ladder trucks that are thirty-two years old and still in active service. They are obsolete, in poor condition, and it is very questionable as to how much longer they will last. I strongly urge that we ask for bids to be submitted as soon as possible as delivery would probably take from one to two years.

Also, at least one new pumping engine should be secured this year as we still have three engines in active service that are thirty-two years old. Our three reserve engines are very old, their ages being as follows: 34 years—32 years—29 years. Delivery on new engines would probably take from one to two years.

A long range program of purchasing at least one new piece of fire apparatus each year for several years would be an excellent plan.

Two new automobiles should be purchased, one to replace the Chief's car which has been in use since 1941 and is in poor condition, its age not warranting the spending of necessary money to restore it to proper condition, the

other car for use by one of the additional District Chiefs added to the Department under the 48-Hour System.

I again recommend a two-way Radio System for our Department which would greatly increase its efficiency. Practically all progressive cities and town fire departments have been so equipped for several years.

At least ten new Fire Alarm boxes should be secured again this year to replace those of a very old and obsolete type; also, additional fire hose to replace defective hose and to build up our reserve supply.

Recent mandatory legislation, effective July 1, 1949, requires each piece of fire apparatus to carry two Oxygen Type Masks, thus making it necessary to secure the additional masks.

Due to lack of funds, very little repairing or painting has been done to Fire Stations since the W. P. A. work. New fences at stations 4 — 8 — 10 are urgently needed; some inside and outside painting at most all stations should be done; leaking roof conditions exist at nearly all stations, some leaking very badly and which should be fixed to prevent more serious damage to station walls.

Funds for making necessary repairs on the above station work should be provided to prevent further deterioration.

I wish to express my appreciation to our Mayor for his continued interest in the Fire Department, especially in the securing of additional apparatus and other fire equipment and appliances.

My sincere thanks to all the officers and members of the Department for their cooperation and efforts to maintain a high standard of efficiency within the department.

Respectfully submitted,

MILTON C. ANDREWS,

MCA/CCR

Chief of Fire Department

REPORT OF AGENT

To the Board of Health

Gentlemen:

During the year 1948 an increased interest was manifested by the people throughout the country of the efforts being made by the various States and Federal government to more adequately protect the health of the people. Particularly in relation to certain forms of medical assistance has this been noted.

For many years, the public has been more or less indifferent to public health needs and they suddenly find that all sorts of suggestions are being advanced as a cure-all for sickness and disease. All these programs should be approached with the greatest of caution for it is no different today than it has ever been that public health costs money and we should always keep in mind our ability to pay for those services.

The further protection of the public health and the care of the sick should come about with caution in instituting new methods of approach to the problem.

Such an interest as is herein mentioned is one which has resulted in greater support of this department in carrying on its usual functions. This has been noted by the added number of people seeking our assistance through the various divisions upon which we desire to comment.

ADMINISTRATION The amount of work in the administrative office has increased almost two-fold, making it necessary to request the services of an additional clerk. Another great aid to this office would be the establishment of a five-day work week instead of the present six-day work week. Where municipal employees work only a five-day week and our offices are maintained on a six-day week it is impossible to work with a full force each day.

COOPERATING CLINIC The cooperating clinic is the only division which has shown any decrease in the number of patients being treated. The decreased need for this work has, no doubt, been due to the fact that more people sought the aid of private physicians together with the fact that we are now approaching the problem of venereal diseases more frankly than heretofore, thus making it possible to approach the public on a delicate subject without too much restraint. The education of our boys while in the military service in matters of social hygiene has aided materially also.

Modern therapeutics have also contributed in large measure to the decrease of the work as the control and cure of these diseases has been facilitated to a remarkable degree in recent years.

During the year, it was found necessary through the Massachusetts Department of Public Health, to curtail our expenses at the clinic. The Board of Health dispensed with the services of one of the four physicians and one of the offices in the suite was relinquished.

GARBAGE During the year a small tractor was purchased for the incinerator, making it possible to handle the materials much more efficiently, thus decreasing the length of time the trucks have had to wait to unload. Three of the four furnaces were completely overhauled at a cost of \$23,000.

The change in personnel wherein the Department of Civil Service required the City to discharge men to be replaced by veterans was very disruptive and created considerable difficulty both in the collection and disposal of garbage. Twenty-four men had to be replaced at practically one and the same time.

The need of different types of vehicles for the collection of garbage and refuse has become increasingly evident and it is to be hoped that future trucks may be purchased that are equipped for this specialty. Many complaints continue to come into the Board of Health about the improper collection of garbage. While many of them are no doubt justified it has been found upon investigation that many complaints have been without foundation and are due to the lack of understanding on the part of the public as to their obligation and that of the Board of Health in the collection of garbage.

ISOLATION HOSPITAL Upon completion of the renovation of the west wing at the hospital, patients were admitted on March 22, 1948. The heating system was modernized by the installation of a large oil burner in one of the furnaces. Two inch water lines were installed to replace small $\frac{5}{8}$ " lines, thus making it possible to have sufficient water pressure throughout the hospital at all times. It was also found necessary to replace most of the electrical circuits in the west wing. The greater portion of this work was carried out by the building department under Mr. Fred R. Ripley to whom the Board of Health is most grateful. As the west wing now stands, it is one of the best contagious disease units existing in Massachusetts at the present time.

With the modern facilities that have been installed, we now find that the nursing personnel is eager to work there.

Mention should be made here of the generous gift received from the New Bedford Kiwanis Club of an iceless oxygen tent unit. This was a much-needed piece of equipment and its use has already meant the difference between life and death for one patient.

MILK DIVISION While the supply of milk produced in this milk shed has continually increased since the end of the war, we are not yet independent of outside production for supplying the city's needs. We believe, however, that within a period of six months the city will, no doubt, be supplying its milk entirely from the local milk shed as was done prior to the war.

PLUMBING DIVISION The largest amount of construction which has ever taken place in the City of New Bedford was carried on since the end of World War 2. In spite of the tremendous burden assumed by the two plumbing inspectors they did not hesitate even when such entailed working extra hours to serve the needs of the City, thus fulfilling a major public health function.

PUBLIC HEALTH NURSING For the first time in four years the nursing division has had a full complement of nurses. This has resulted in effectively controlling the spread of many contagious diseases. More particularly, the follow-up work which is so essential to a tuberculosis control program was able to be carried out efficiently.

SANITARY INSPECTION This division is sadly in need of additional personnel for investigating the ever-increasing number of nuisances reported to this office as well as carrying out a better program on restaurants and other eating and drinking establishments. While considerable progress was made with our restaurant program, it is not progressing as satisfactorily as it should, both because of lack of personnel as well as lack of cooperation by the industry.

TUBERCULOSIS The tuberculosis clinic and the mass x-ray program got under full sway during the year 1948 with remarkable results as will be pointed out later. The patronage at the clinic has increased beyond the expectations of the Board of Health and the interest the public has shown in tuberculosis has been most gratifying from a public health standpoint.

VITAL STATISTICS We desire to point out that while a mass x-ray program was in progress there was one less case of pulmonary tuberculosis reported during the year than had been reported in 1947. However, an astonishing fact is that while the number of deaths from this disease in 1947 was 39, during 1948 there were only 20 deaths or a reduction of almost 50% in the course of one year.

We are reluctant to comment at this time as to the reasons for such a drop in the tuberculosis death rate. This matter will need a thorough study before any conclusions are reached.

The decrease in the death rate of children under one year since 1944 is worthy of emphasis. During the course of five years the rate has dropped from 41.5 to 23, the lowest in the history of the city. In such a short span of time, the decrease has been almost 44%.

Vital statistics are the measure used in evaluating public health programs. If this is so, New Bedford can be justly proud of the results obtained in the decrease of our infant deaths and in pulmonary tuberculosis.

Respectfully submitted,

ALPHEGE A. LANDREVILLE,

Agent

The following is the record of deaths and mortality rates since 1889:

Year	Deaths	Rate	Population
1890	775	18.9 +	41,000

INFANT MORTALITY

The following record is interesting to those who are engaged in infant welfare work.

Year	Under 1 month	Year	Under 1 month
1927	98	1938	51
1928	96	1939	32
1929	62	1940	54
1930	64	1941	34
1931	90	1942	49
1932	52	1943	50
1933	58	1944	36
1934	70	1945	32
1935	57	1946	46
1936	61	1947	38
1937	52	1948	31

The infant mortality rate for the same period follows:

Year	Rate	Year	Rate
1927	39.9	1938	29.9
1928	40.1	1939	20.2
1929	31.3	1940	29.3
1930	32.1	1941	20.4
1931	49.0	1942	25.4
1932	30.0	1943	27.2
1933	34.8	1944	29.9
1934	39.6	1945	19.7
1935	32.7	1946	22.3
1936	34.9	1947	16.8
1937	30.7	1948	14.6

Respectfully submitted,
 HERMINE PALME,
 Clerk.

CAUSE OF DEATH	Jan.	Feb.	Mar.	Apr.	May	June	July	Aug.	Sept.	Oct.	Nov.	Dec.	Total
I. Infectious and Parasitic Diseases													
Diseases Due to Bacteria													
1. Typhoid Fever								1					1
6. Cerebrospinal (meningococcus) meningitis	1										1		2
13. Tuberculosis of the respiratory system (including the bronchial and mediastinal lymph nodes)													
b. Without mention of occupational disease of the lungs.....	1	3	2	1	2	1			3	4	1	2	20
14. Tuberculosis of the meninges and central nervous system.....			1								1		2
20. Tuberculosis of the genitourinary system						1							1
24. Septicemia and purulent infection (non-puerperal)													
a. Septicemia											1		1
Diseases Due to Spirochetes													
30. Syphilis													
c. Other syphilis of the central nervous system.			1					1					2
d. Aneurysm of the Aorta												1	1
Diseases Due to Fungi													
44. Other infectious and parasitic (communicable diseases)													
b. Lymphogranulomatosis (Hodgkin's disease)					1			1				1	3
II. Cancer and Other Tumors													
45. Cancer of the buccal cavity and pharynx													
b. Tongue												1	1
46. Cancer of the digestive organs and peritoneum													
a. Esophagus	1		1				2			2		1	7
b. Stomach	1	1	3	2	2	1		1	2	4	3	1	21
d. Rectum and anus		1	1	3				2					7
e. Intestines (except duodenum and rectum)	1	4	2	3	4	5	5	1		2	4	2	34
f. Liver and biliary passages	1		2	1			1					1	6
g. Pancreas			1	1	2	2	1	2			2		11
h. Mesentery and peritoneum								1					1
47. Cancer of the respiratory system													
a. Larynx		1		1									2
c. Bronchus	2				2								4
e. Pleura			2	1	2		3	1			1	1	11

CAUSE OF DEATH	Jan.	Feb.	Mar.	Apr.	May	June	July	Aug.	Sept.	Oct.	Nov.	Dec.	Total
II. Continued.													
48. Cancer of the uterus													
a. Cervix		1			1			2	2		1		7
b. Other and unspecified sites						2	1	1		2	1		7
49. Cancer of other female genital organs													
a. Ovary			1				4						5
50. Cancer of the breast	2		1	4	1		1		1		2	1	13
51. Cancer of the male genital organs													
b. Prostate	1							1			2		4
52. Cancer of the urinary organs (male and female)													
a. Kidney				3						1	1		5
b. Bladder	1		1	1						1			4
55. Cancer of other and unspecified organs													
b. Bone (except jaw bone and accessory sinuses)		1						1					2
c. Thyroid gland								1					1
e. Other and unspecified organs	3	2		4	4		1		1		1	1	17
Nonmalignant Tumors and Tumors of Unspecified Nature													
57. Tumors of unspecified nature													
e. Other and unspecified organs							1		1				2
III. Rheumatism, Diseases of Nutrition and of the Endocrine Glands, Other General Diseases and Avitaminoses													
Rheumatic Diseases													
58. Rheumatic fever													
f. Rheumatism (not specified as acute or chronic)							2						2
59. Chronic rheumatism and other rheumatic diseases													
b. Other chronic articular rheumatism			1			1							2
Disease of Nutrition and of the Endocrine Glands and other General diseases.													
61. Diabetes mellitus	2	5	4		1	1	4	4	2		2	1	26
63. Diseases of the thyroid and parathyroid glands													
b. Exophthalmic goiter		1	1										2
IV. Diseases of the Blood and Blood-Forming Organs													
72. Hemorrhagic conditions													
b. Hemophillia	1												1
73. Anemias (except splenic anemia)													
a. Pernicious Anemia				1		1	1						3

[illegible]

CAUSE OF DEATH		Jan.	Feb.	Mar.	Apr.	May	June	July	Aug.	Sept.	Oct.	Nov.	Dec.	Total
dial degeneration, not specified as rheumatic		19	9	21	15	9	10	11	14	7		8	18	141
VII Continued.														
e. Other myocarditis (not specified as acute, chronic or rheumatic)			2	3		4		1		5				15
94. Diseases of the coronary arteries and angina pectoris														
a. Diseases of the coronary arteries		23	22	27	16	15	23	25	21	13	15	16	18	234
b. Angina pectoris		1	1	3	1	2	3	1	4	2	3	2	1	24
95. Other diseases of the heart														
b. Other diseases of the heart, specified as rheumatic		2	2	1		1			2	1		1	2	12
c. Other diseases of the heart not specified as rheumatic		2	4	1	4	1		1	1			1		15
96. Aneurysm (except of heart and aorta)			1										1	2
97. Arteriosclerosis (except coronary or renal sclerosis)		6	9	14	6	7	11	15	13	15	9	12	9	126
99. Other diseases of the arteries									1	1				2
100. Diseases of the veins														
a. Varices							1							1
b. Other diseases of the veins											1			1
VIII. Diseases of the Respiratory System														
106. Bronchitis														
b. Chronic					1									1
c. Unspecified		2												2
107. Bronchopneumonia (including capillary bronchitis)		8	6	10	10	1	6	3	1	4	3	3	4	59
108. Lobar Pneumonia				2	2	1								5
111. Hemorrhagic infarction, thrombosis, edema, and chronic congestion of the lungs														
a. Hemorrhagic infarction and thrombosis of the lungs					1					3	2	1	1	8
b. Acute edema of the lungs					3				1	2	1	2		9
c. Chronic and unspecified congestion of lungs		1	1				1	1						4
112. Asthma			2		3	2	1		1				1	10
113. Pulmonary emphysema							1				2			3
114. Other diseases of the respiratory system (except tuberculosis)														
e. Other and unspecified diseases of the respiratory system											1			1
IX. Diseases of the Digestive System														
115. Diseases of the buccal cavity, pharynx, tonsils and adnexa														
b. Septic sore throat					1									1
117. Ulcer of stomach or duodenum														
a. Stomach				1							1		1	3

[illegible]

CAUSE OF DEATH	Jan.	Feb.	Mar.	Apr.	May	June	July	Aug.	Sept.	Oct.	Nov.	Dec.	Total
XII. Diseases of the Skin and Cellular Tissue													
151. Carbuncle and furuncle											1		1
153. Other diseases of the skin and cellular tissue							1						1
XIII. Diseases of the Bones and Organs of Movement													
156. Diseases of the joints and other organs of movement													
a. Diseases of the joints (except tuberculosis and rheumatism)										1			1
b. Diseases of other and unspecified organs of movement	1												1
XIV. Congenital Malformations													
157. Congenital malformations (stillbirths not included)													
Congenital malformations of the central nervous system												2	2
b. Spina bifida and meningocele												1	2
e. Congenital malformations of the heart		1										1	2
g. Congenital malformations of the digestive system		1					1						2
XV. Diseases Peculiar to the First Year of Life													
158. Congenital debility (cause not stated)			1					1					2
159. Premature birth (cause not stated)	2			1		1	1			2	1	1	9
160. Injury at birth													
a. Intracranial or spinal hemorrhage....				1						1		1	3
161. Other diseases peculiar to the first year of life													
a. Asphyxia (cause not specified), atelectasis	1	1	1		1			1	1				6
c. Other specified diseases peculiar to the first year of life	1	1	1			1						1	5
XVI. Senility													
162. Senility													
b. Senility without mention of senile dementia										1			1
XVII. Violent or Accidental Deaths													
163. Suicide by poisoning													
Suicide by solid or liquid poisons													
b. Barbituric acid and derivatives										1	1	1	3
g. Other solid or liquid poisons								1					1

CAUSE OF DEATH	Jan.	Feb.	Mar.	Apr.	May	June	July	Aug.	Sept.	Oct.	Nov.	Dec.	Total
Suicide by poisonous gases													
h. Illuminating gas	1		1						1		1		4
o. Other carbon monoxide gas		1											1
164. Suicide by other means													
a. Suicide by hanging or strangulation						1	1					1	3
b. Suicide by drowning					2								2
c. Suicide by firearms and explosives...											1		1
d. Suicide by cutting or piercing instruments				1									1
170. Motor-vehicle accidents													
c. Automobile accidents (except collisions with trains or street cars			1	2					2			2	7
178. Accidental absorption of poisonous gas													
a. Illuminating gas		1									1	2	4
x. Other poisonous gases											1		1
181. Accidental burns (except conflagration)			1					1			3		5
183. Accidental drowning				1					1	1	1		3
195. Other accidents													
e. Other and unspecified accidents	3				3	2	2	3	2	1	2	1	19
XVIII. Ill-Defined and Unknown Causes													
200. Ill-defined and unknown causes													
a. Ill-defined	4	3			1						1	1	10
c. Unknown or unspecified cause		1						1					2

Respectfully submitted,

HERMINE PALME, Clerk.

DIVISION OF PUBLIC HEALTH NURSING

April 20, 1949

To the Board of Health:

Gentlemen:

I herewith submit my report of activities for the year ending December 31, 1948.

1. CHILD HEALTH — FIELD

Visits to Homes	12,004
Number of Children Visited	16,723

2. CHILD HEALTH CLINICS

Number of Clinics	221
Total Attendance	1,836
Children Attending	619
New Babies	425
Examined by Physician	790

Bacteriologist

REPORT OF T. B. CLINIC

New Bedford, Mass.
March 15, 1949

To the Board of Health:

Gentlemen:

I hereby submit my annual report as Chief of the T. B. Clinic for the year 1948.

During the year 1948 and beginning in July of this year, the Tuberculosis Clinic moved its equipment out into the field and began to do mass x-ray work in the local industries. It is important to note that the mass survey work had been going on in the clinic rooms of the Olympia Building since the inception of this mass program.

The following industrial plants had the x-ray equipment installed and chest x-rays taken of all those employees who volunteered to have their chest x-rayed. Preliminary educational work had preceded us by the executive director of the tuberculosis league, Mr. John Gunn. The following plants were processed throughout this year:

Acushnet Process Plant "B"	Nashawena Mills
Acushnet Process Plant "A"	Wamsutta Mills
Continental Screw	Narragansett Shirt Co.
Aerovox Corp.	New Bedford Rayon
Nonquitt Mills	Fisk Cord Mills
Soule Mill	Hathaway Mfg. Co.
Hoosac Mills Corp.	Morse Twist Drill

MASS SURVEY ACTIVITIES

70 mm films in field	9,195
Recalls	282
Returned	183
Percentage of employees x-rayed	70%

TUBERCULOSIS CLINIC ACTIVITIES

70 mm films	8,120
Recalls	663
14 x 17 (large films)	1,095
Total number of patients seen at clinic day	
(Monday)	882
Number of patients seen at clinic for first time	
(Monday)	661
Number of patients residing outside of New Bedford	64

Pulmonary Tuberculosis cases active

A. Minimal	9	
B. Moderately advanced	17	
C. Far advanced	16	
Total		42
Suspicious pulmonary tuberculosis		21
Chronic pulmonary tuberculosis cases inactive		236
Number of non-tuberculous cases		531
Number of cases reported to New Bedford Board of Health		35
Sputum examinations advised		99
Tuberculin Patch Tests		67

If no pulmonary tuberculosis was found in the reading of the 70 mm film or miniature film, a yellow card was directed to the individual and he was so notified. If, on the other hand, disease which was non-tuberculous in origin, definite or otherwise, was noted in the reading of the 70 mm film, such individuals were requested to return for further x-ray study. Final x-ray and clinical opinion was then given to the individual or his family physician.

We x-rayed approximately 70% of the employees in the industries listed above. Although the figure is not what we would like it to be, it is hoped that a better response on the part of the public will bring this figure to a higher level in the future. It is our hope that the total number of mass survey films in the year 1949 will be considerably higher than the year 1948. We know that there are still many cases of active pulmonary tuberculosis to be found in this city and surrounding areas. It must be appreciated, therefore, that tuberculosis cannot be eradicated from any community until the source of this disease is completely eliminated. The only hope lies in the periodic chest x-raying of industries as well as everyone else in the community. The complete eradication of such a disease is everyone's problem; therefore, it becomes incumbent upon everyone to have a chest x-ray at least once a year.

MAURICE D. KENLER, M. D.

Chief of Clinic

ANNUAL REPORT

OF THE

**INSPECTOR OF WIRES
POLICE SIGNAL SYSTEM
STREET LIGHTS**

TO THE CITY COUNCIL

For the Year 1948

BRADBURY-WARING, INC. — *Printers*
1949

Annual Report

New Bedford, Massachusetts

January 12, 1949.

To the City Council of the City of New Bedford.

Gentlemen:

I respectfully submit the annual reports of the departments of the Inspector of Wires, Street Lights and the Police Signal System from January 1, 1948 to and including December 31, 1948.

INSPECTOR OF WIRES

8,491 inspections were made during the year.

The following are some of the larger electrical installations inspected during the year:—

J. Rubin & Sons: 212 fixtures; 245 outlets and switches; 23 motors.

Wonder Bread Bakery: 3 outlets; 8 — 550V motors.

Union Street Railway Co.: 6 transformers; 174 fluorescents; 274 outlets and switches; 24 motors.

Knowles Loom Reed Works: 23 fluorescents; 100 outlets and switches; 4 motors.

Jonathan Handy Co.: 15 motors; 3 transformers; 215 outlets and switches; 150 fluorescents; 230V and 550V services and a hoist.

Bedford Process: 74 fluorescents; 11 motors; 5 transformers.

A. Freedman & Sons: 105 fluorescents and 4 motors.

Swain School: 3W service; 10 cold cathodes; 125 outlets; oil burner; 10 fluorescents; 7 flood lights.

Diamond Laundry: 220V and 550V services; 14 fluorescents; 6 motors; 52 outlets and switches.

Norlander Machine Co.: 3 transformers; 3 fluorescents; 7 motors.

North End Laundry: 108 outlets and switches; 96 fluorescents; 16 motors; 4 power switches; 3 transformers.

Dartmouth Finishing Co.: 9 large motors.

Stokley Bros.: 44 univents; switches and controls; 400 amp. feeders and switchboard.

Eastern Technical School: 70 recps; 5 new panels; 100 amp. meterloop and feeders.

Associated Groceries: 50 fixtures; 20 switches; panel and repairs.

Tropical Banana Co.: 12 motors; service and meterloop; 28 outlets and switches; 1 fluorescent.

North Cafe: 3 HP air conditioner.

McGee's: 5 transformers for sign; 6 spot lights; 56 fluorescents; 6 show cases; 128 outlets and switches; blower motor and timeswitch.

N. B. Rayon Co.: 5 KV service; 303 fluorescents; 40 recps; 5 transformers; 57 large motors.

Coater's, Inc.: 2 large condensation pumps; 2 oil burners; 3 KVA transformers; 400 amp service; 14 motors; 4 fluorescents.

Dawson's Brewery Garage: 103 outlets and switches; 15 motors and 3 KVA transformers.

N. B. Cordage Co.: 13 KVA transformers; 1600W water heater; 14 fluorescents; 6 outlets and switches; 4 motors.

N. B. Reconstruction Co.: 575V elevator.

Fibre Leather Mfg. Co.: 550V oil burner; 3,000W preheater; 2 motors.

Ramsay Mills: 3 — 250,000 feeders; 3 — 3 — 0's feeders; 3 KVA transformers; 200 looms; 300 fluorescents; 27 humidifiers.

Hathaway Mfg. Co.: 2 damper control motors; 6 unit heaters; 2 — 10 HP elevators and feeders; 6 outlets.

Star Store: Escalator and 6 heaters; 24 outlets.

Inspections after fires numbered 203. This is an increase over last year. Re-inspection of all wiring in buildings where fires were reported were made. All defective wiring was ordered removed and replaced by approved wiring.

During the year I have investigated and reported to the City Council on 152 petitions of wire using companies. This has involved 116 poles, 32 relocations, 76 transfers, 9 removals, 2 manholes, 1172 feet of conduit, 19 fibre ducts, 5 enlarged manholes, 12 feet transite duct, 980 feet buried cable.

After investigation, I have approved 68 applications for the moving of buildings.

The following is a breakdown of the work this department has completed this year:

Requests for inspections	4,422
Wiring new buildings	122
Wiring old buildings	3
Addl. sockets, switches, outlets and alt.	9,180
Repairing defects	462
Oil burners	730
Thermostats	14
Home for Aged	1
Time clocks	8
Air Conditioners	16
Inside signs	73
Carnivals	9
Elevators	4

Cold Cathode	48
3W receptacles	318
Outside signs	136
Gasoline pumps	47
Advisory	282
Electric ranges	43
Flood lights	179
Gas burners	29
Electric fixtures	8,869
Fluorescent fixtures	4,043
110V motors	915
220V motors	398
550V motors	504
Permits to contractors and owners	3,694
2W receptacles	5,796
Transformers	470
New meterloops	264
New services	476
Services reconnected	38
Inspections after fires	*203
Inspections made	8,491
Reports of defective wiring sent to contractors and owners	2,594
Certificates on rough work	2,444
Permits to connect electric services issued to N. B. Gas & Edison Light Co.	3,093
Red tags	20
Emergency lighting	28
Service breakdowns	13
Oil pumps	60

Work in Brock Ave., the prescribed area for 1946, is progressing and should be completed in 1949 by the Telephone Company and the N. B. Gas & Edison Light Company. Work on the 1947 area should be started in 1949 and completed in 1950. A new area should be prescribed in January 1950 and sent to the City Council for approval.

The operating expenses for the year were:

General Expenses	\$ 1,111.54
Payrolls	13,139.08
New Equipment	147.89

Total	\$14,398.51

POLICE SIGNAL SYSTEM

Andrew E. Pigeon was appointed Police Signal Electrician by me on January 19, 1948. Mr. Pigeon received the highest mark over all other applicants for the position in an examination given by Civil Service. He is a veteran of World War II.

The installation of underground ducts and cable on Brock Ave., the 1946 prescribed area, has progressed satisfactorily. A new 8 conductor underground cable has been installed from Cove and Water Sts., south of Rodney Fr. Blvd., to Brock Ave. and then south to Dudley St., a distance of 3,433 feet. We have also installed 7 joint Fire and Police Signal pedestals on Brock Ave. New aerial lines were also installed on David St., from Brock Ave. to East Rodney French Blvd. and on Dudley St., from Brock Ave. to West Rodney French Blvd. This work on Brock Ave. will allow the removal of about 6,200 feet of overhead wires on Cove St. and East Rodney French Blvd.

The following is a breakdown of the work done by the Police Signal System this year:

Central Station:

Switchboard repairs	37
Telephone repairs	4
Latest type telephone was installed on switchboard	

North End Station:

Switchboard repairs	24
A new main line battery was installed	

Police Boxes:

Box repairs	92
Box inspections	54
Boxes painted	10
Boxes reconditioned	3

Overhead Police Signal Wires:

Line repairs	50
General inspections	37
Change over to new poles	50
Renewed 3,000 feet of overhead lines on Acushnet Ave. near White St.	

Underground Police Signal Cables:

Cable repairs	15
New splices	6
General inspections	17
Replaced old lead cable on Acushnet Ave., between East Merrimac and Wamsutta St., a distance of 610 feet with new rubber covered cable.	

Traffic lights — Union and County Sts.:

General inspections	13
Repairs	15
Painted	1

Traffic lights — Kempton St. and Rockdale Ave.:

General inspections	7
Repairs	5

This installation was completed on January 14th and the lights were officially turned on January 16th.

A new gasoline driven water pump was purchased and will be used to pump out manholes. This pump will help the department in maintaining police signal service where cables are under water and have to be repaired quickly.

The operating expenses for the year were:

General Expenses	\$3,815.27
Payrolls	5,386.83
New Equipment	164.75
	<hr/>
Total	\$9,366.85

STREET LIGHTS

This year 20 — 100 c. p. overhead lights and 8 — 250 c. p. ornamental lights were installed.

Many of the old type 250 c. p. overhead lights were replaced with the new type Westinghouse fixture.

According to the schedule, the new lighting system on Brock Ave. should be completed in 1949.

1,107 street lights were broken, at a cost of \$195.51 to the city.

At the end of the year, there were 4,598 street lights in the city and the cost per year is as follows:

2,174	100 C. P. overhead	\$14.40
929	250 C. P. overhead	23.88
32	250 C. P. underground	
	(Hawthorn St.)	23.88
1,086	250 C. P. underground	31.20
36	400 C. P. overhead	35.28
259	400 C. P. underground	42.72
82	600 C. P. underground	54.36

Expenses of this department for the year were:

General Expenses	\$105,083.08
Payrolls	1,000.00
	<hr/>
Total	\$106,083.08

Trustees' Report

*To the Honorable, the City Council of the City of New Bedford,
Mass.*

The Trustees present their Ninety-sixth Annual Report to the City Council in the Report of the Librarian, which has been adopted by the Board.

Respectfully submitted,

BOARD OF TRUSTEES,

LAURENCE G. HILL,

Clerk of the Board

Librarian's Report

I herewith respectfully submit for your approval the Ninety-Sixth Annual Report of the New Bedford Free Public Library.

Although the effectiveness of a public library should not be judged by its circulation figures alone, a drop of 16,749 from 1947 is not to be dismissed lightly. A part of this loss is due to the closing of the deposit stations at Bay Village and Presidential Heights and the enforced closing of the North Branch for five weeks in November and December for necessary boiler repairs. However the major portion of the drop must be attributed to the inability of the Library to provide current books because of lack of funds. In 1948 for the first time in many years the city appropriated money for the purchase of books and periodicals and although the sum was small it is hoped that the necessity for increasing this amount will become more apparent in the coming year.

In other fields than that of home book circulation the Library has been increasingly active.

Outstanding as usual among the library's varied activities were the four public forums sponsored during the year. These were well received and stimulated considerable public interest.

ADULT SERVICES

The Division of Adult Services was established in 1948 in accordance with the organization plan approved by the board of Trustees. However it was not until October that the supervisor was able to assume her duties.

Adult circulation as previously stated showed a loss for 1948. There was also a loss in total number of registered borrowers. Both of these losses can be remedied by a substantial increase in appropriation for books.

The Reference service of the Library continues to prosper and expand. Nearly 7000 requests were received and answered during 1948. The above figure refers only to important questions that required some search by the reference attendant. Many more casual or minor questions of fact or information are not included in the total. It is interesting to note that over 25% of all requests were by telephone. There appears to be an increasing trend to call the Library for spot information on the part of the public. That the Library is considered one of the best sources of information on whaling is well evidenced by the large number of inquiries we receive both in person and by mail on this subject. It is only natural that we work in close cooperation with the Bourne Whaling Museum in this connection.

The extension service of the Library for 1948 consisted of book service to Saint Luke's Hospital, six rest homes, two housing projects and personal service to shut-ins at their own homes. Plans are being made to extend book service to the City Infirmary. It is unfortunate that the deposits at Presidential Heights and Bay Village had to be withdrawn permanently in November at the request of the Housing Authorities because of lack of space for housing the collection. We hope future circumstances will allow us to reopen them. The cooperation of the Girl Scouts in taking books to shut-ins has been greatly appreciated, and it is hoped that contact can be made with other organizations so that this service can be extended to take care of all legitimate requests.

During the past few months the entire fiction collection at the Main Library has been reviewed with the purpose in mind of organizing a comprehensive plan for additions and replacements as funds allow.

JUVENILE SERVICES

The work of the juvenile department is particularly important since it is here that we first meet our future adult readers. Consequently every effort is made to interest the children in the Library. The Supervisor of Children's work has toured the city

speaking before the classes in all schools, public and parochial. In addition the seventh grades of all schools have been brought to the Library for instructions in the use of the catalogs, general reference books and other materials which will be useful to them in junior and Senior High School.

The Juvenile department has given several courses and examinations for Girl Scouts working for Bibliophile merit badges. Girl Scouts have also done some of their service work under the direction of the Children's Supervisor and her staff.

Celebration of holidays by special exhibits and displays has added greatly to the attractiveness of the Children's room. The beautiful Christmas exhibit of a crepe paper transparency depicting a stained glass window framed in greenery attracted considerable attention both from children and adults.

Work with young people has been started and will be further developed in the coming year.

ART DEPARTMENT

The use of the picture collection particularly in cooperation with the schools has continued at a high level. A special display of opera scores in connection with Metropolitan Opera broadcasts has also been popular. The total circulation of books was 4199 and pictures 42,861. There was a loss of 301 in book circulation but a gain in the circulation of pictures of 1,712.

GENEALOGICAL DEPARTMENT

Since the Genealogical collection has been returned to its former quarters it has been open 9—12, and 2—5 Tuesday through Saturday, and 2—9 P.M. on Sunday. There have been many requests that the hours be increased. Since it is planned to install the microfilm reader and microfilm newspaper file in this room I believe it will be necessary to extend the hours when the room will be open to the public.

BRANCHES

All of the branches show circulation losses in varying degrees. The physical condition of the branches is very bad. Specific recommendations in this connection will be found later in this report.

PUBLIC RELATIONS

As mentioned before the Public Forums were well received and served to keep the Library in the public eye as well as stimulate thought on important current problems. The Library sponsored its annual series of book talks by members of the staff and well-known local book reviewers. The staff members particularly the Adult and Juvenile Supervisors have been very active in giving book reviews and talks to civic and social groups in New Bedford and vicinity.

Exhibits of the paintings of Antonio Gattorno and Steven Trefonides were held in the Library during 1948. In addition to these two special exhibits the library presented book exhibits in connection with various local and national promotions such as Book Week, United Nations, Tuberculosis and many others.

Cooperation with the Standard-Times and Station WNBH has been uniformly excellent.

BUILDINGS

All of the Library Buildings are in great need of repair and structural improvements. Little has been done in the past. Nearly every room needs routine painting; leaks in the roofs have caused water damage in many places, notably in the Lecture Hall of the Main Library. Specific recommendations will be found later in this report under that heading.

PERSONNEL

Mr. William T. O'Rourke resigned as Librarian in October of 1948 to accept the position of Associate Director of the

Buffalo, N. Y. Public Library. Mr. O'Rourke's resignation was accepted with regret by the Trustees, and Miss Minerva F. Maxfield was appointed Acting Librarian from October 23 to December 6 when the present Librarian, Laurence G. Hill assumed his duties.

Although Miss Minerva F. Maxfield will not begin her retirement until January 1949, it seems appropriate that the matter be recorded in the 1948 Annual Report. Appointed in November of 1907, Miss Maxfield at retirement will have completed more than forty-one years as a member of the Library Staff. In various capacities as a library assistant, Librarian's Secretary and Executive Assistant to the Librarian and most recently as Acting Librarian, she has been a most devoted, capable, willing and dependable employee. No one could have done a better job.

Though realizing her loss will be sorely felt by the Library and all with whom she worked, we wish her many happy years of well-merited retirement.

The Library suffered a great loss in the untimely death in January 1948 of Miss Alice H. Tripp, Reference Librarian for more than twenty years. Miss Marion H. Bonner, formerly Reference Assistant has been promoted to Reference Librarian.

Miss Claire N. Riley was appointed Supervisor of Adult Services and assumed her duties in October. Miss Charlotte S. Nye was appointed Supervisor of Children, School and Young People in September. Other appointments and promotions were made as necessary.

TRUSTEES

Mrs. Carolyn B. Manning and Rt. Rev. Msgr. John F. McKeon were reappointed to the Board of Trustees.

RECOMMENDATIONS

The recommendations listed here are for the most part the same as last year. Each year in which no action is taken means further deterioration in the case of buildings, continued lack of growth in the case of insufficient funds.

1. A City appropriation of \$10,000 for books and periodicals.
2. Paint and repair lower floors—Main Library.
3. Install modern lighting in Reference Room, Ingraham Hall and Children's Room.
4. Install new lighting, paint and repair—South Branch.
5. Paint, repair wall, ceiling and floors at North Branch.

I would like to extend my thanks to the Library Trustees and to the Staff for the excellent cooperation I have received since my recent arrival.

Respectfully submitted,

LAURENCE G. HILL

STATISTICS IN FORM RECOMMENDED BY THE AMERICAN LIBRARY ASSOCIATION

Annual Report for year ending December 31, 1948.

Name of Library—New Bedford Free Public Library.

City—New Bedford. State—Massachusetts.

Name of Librarian—Laurence G. Hill.

Date of Founding—1852.

Population served—110,341 (U. S. Census 1940).

What government unit served—City.

Terms of use—

Free lending.

Free for reference.

Total number of agencies—178

Central Library, 3 Branches, 171 school deposits and classroom libraries, 1 hospital, 2 housing developments.

CITY OF NEW BEDFORD
BOARD OF PARK COMMISSIONERS

December 31, 1948

The Honorable City Council:

Gentlemen:

In accordance with the provisions of law the Board of Park Commissioners herewith submits its 55th Annual Report on Parks, Playgrounds, Youth Activities, Bath Houses and Militia, for the fiscal year ending December 31, 1948.

Meetings were held monthly except during the months of July and August.

Mr. J. Alfred Fredette, whose term expired in May 1948, was reappointed by the Mayor for a period of five years, until May 1953.

Mr. Ernest Newby, who was on the approved Civil Service list, was appointed an Assistant Recreation Leader to serve under Mr. Alan Grimshaw, at the West End Youth Center.

The bids for Concession Privileges for one year were advertised for in April, and were awarded to George J. Higham, Buttonwood Park, for \$318.50, and to John S. Souza, Brooklawn Park, for \$135.00, the high bidders.

Appropriations and expenditures for the entire year are shown in the various tables attached to this report.

The general operation of the department was not changed to any great extent from that followed in the previous year. The parks afforded great opportunities and facilities for large parties to enjoy themselves, and many societies, schools, and organizations in the city and surrounding towns have taken advantage of the parks' offerings.

The increased requests for use of the baseball diamonds by the numerous baseball teams have proved that we do not have sufficient diamonds in the park system to meet

these demands. Also our appropriation does not warrant the extra cost to maintain added athletic fields.

There is no park anywhere today that through its ever increasing usefulness does not call for additional improvements and necessary repairs, and our parks are no exception.

The present attractions are not sufficient to meet all demands by the public and certain improvements could be made which would materially benefit and make less difficult the requirements of maintenance. The more a park is patronized and the more demands of the public are complied with, the greater becomes the expense of its upkeep. In the maintenance of the department is a great expense for water which must be provided for various purposes, also the cost of lighting, which public utilities are a great burden upon the limited appropriation we have for our use.

A gift to the city of a section of land at Sassaquin Pond by Mr. Franklin J. Gurney, situated some miles outside the city proper, and turned over to the Park Department to be developed as a bathing beach, will mean additional expense for improvement and maintenance, and unless we are granted the increase request requested in our budget for the year 1949, we will not be able to take care of this beach.

The new equipment we were able to purchase through the appropriation granted for this purpose, has been a great help in maintaining the parks at their present standard.

Many important and necessary improvements could be brought to your attention, but we are aware of the impossibility of their being undertaken at the present time for financial reasons.

Respectfully submitted,

JOHN ANTHONY, Chairman

To the Honorable Board of Park Commissioners:

Gentlemen:

I have the honor of submitting herewith my annual report covering the work and activities of the Park Department, and incorporated are the reports on Playgrounds, Youth Activities, Bath Houses, and Militia.

The work of the department during the year has been almost wholly of a maintenance nature, as no funds were available for construction.

This year we were fortunate in being able to procure the following new equipment, which enabled the park employees to perform their duties in a more efficient manner. Two sprinklers on roller bases, two power greens-mowers, ten hand lawn mowers, a new pick-up truck, a reversible snow plow, a power edge trimmer, three fairway mower units, a band saw and a spiker and perforator.

The beauty and attractiveness of our parks and the satisfaction expressed by the many who take advantage of our facilities depends upon the amount of work that is accomplished. With the limited amount of help and these men working on a forty-hour a week basis, it is difficult to maintain the standard that is desired, but we feel we have parks that are a credit to the department.

The call for community gardens increases each year, but we have no more space available than in past years.

Twenty-six tennis nets were purchased for the three parks wherein the tennis courts are situated, and these were a very necessary item, as the ones we had were in constant need of repair.

Fifty rose bushes were purchased for our rose garden in the Common; also six rose bushes were donated by the Greater New Bedford Garden Club.

The plot of land bordering on Sassaquin Pond, deeded to the Park Department by Mr. Franklin J. Gurney, was

graded, stumps and brush removed, and a bathing beach made; also a suitable parking place was made for cars.

Repairs and improvements were made in the various parks.

Several large dead trees were removed from the different parks and replaced with new trees and shrubs.

The trolley car tracks were removed from Bridge Park and flower beds moved to a more suitable location on this park.

Brooklawn Park: Extensive repairs were made to the bleachers; repaired and painted the Ricketson House; a new overhead cable installed at the skating house.

Buttonwood Park: General repairs were made to the greenhouse and the building was painted on the outside; and a new automatic vent on the main heating system was installed; a new overhead cable was installed from the work shop to the garage.

Hazelwood Park: The work shop and the garage were painted, and two side walls of the Community House were shingled and the house painted.

The following improvements are deemed necessary to maintain our parks in a good condition:

Tennis courts in all the parks should be rebuilt and finished with a hard surface. The frequent maintenance and closing required to keep clay courts in playable condition would not be necessary.

Driveways in all the parks are in a bad condition and the longer they are allowed to remain as they are the greater the cost of maintenance, and I would recommend that these driveways be covered with 2" bituminous concrete, which would prolong the life of these driveways for several years.

To increase the seating capacity at Brooklawn Park athletic field portable bleachers to accomodate 1,000 people,

should be purchased. The large crowds who patronize the various events at this park would certainly welcome this convenience.

The iron fence along both sides of the causeway at Buttonwood Park is in bad shape and needs replacing with a chain link fence.

It is requested that sufficient funds be provided in the 1949 budget to carry out these improvements.

BATH HOUSES:

The Municipal Bathing Beach, under the supervision of William E. Foster, had a very good season. The season opened on June 20th and had a record attendance for the first day, and for every day thereafter until the close of the season on September 12th.

The continuous extremely hot weather during the summer, the hottest summer known for a number of years, made the bathing beaches the most popular recreation resort, and it also proved a prosperous season financially.

Whereas the city has always been fortunate in having the weather cool off at sundown in the past years, this summer of 1948 proved an exception, as we had many hot and humid nights so people were allowed to stay on the beaches much later than they did in the past.

Our attendants, lifeguards and police ably took care of the great number of people using the bath house facilities and also those who just came to spend the day on the beach to cool off. Although our force was adequate to care for a normal crowd, this year the employees were obliged to put in many hours of overtime.

As a day to day record is kept of both the temperature and weather conditions, we find the records show we had only three rainy days from the time the season opened to the close of the season; one day in June, one day in July, and one day in August.

I take this opportunity to extend my sincere thanks to the employees of the Department for the good work they have done, and to those in charge of recreation for the efficient way they have carried on this work.

To the Park Commissioners, my thanks for the support and counsel given me at all times.

Respectfully submitted,

THOMAS E. HALLIWELL,

Superintendent of Parks

Mr. John A. Lucien, Range Officer, submits the following report on the use of the Rifle Range at Russells Mills:—

May	16	Battery A. 212th FA. Mass. N. G.
May	23	Legion of Guardsmen
June	13	Battery C. 212th FA. Mass. N. G.
June	19	Hdqrs. Battery 212th FA. Mass. N. G.
June	20	Hdqrs. Battery 212th FA. Mass. N. G.
June	27	Battery A. 212th FA. Mass. N. G.
July	11	Legion of Guardsmen
July	18	Boy Scouts of America, Troop 3, St. Andrews
Aug.	8	Legion of Guardsmen
Aug.	15	New Bedford Revolver and Rifle Club
Sept.	12	Legion of Guardsmen
Sept.	19	New Bedford Revolver and Rifle Club
Oct.	10	Hdqrs. Battery 212th FA. Mass. N. G.

The National Guard Training program in marksmanship has been stepped up considerably for 1949 and it is imperative that the work required to put the range in proper order be completed at an early date to permit carrying out this program.

DIVISION OF RECREATION

PLAYGROUNDS

The playgrounds were opened for a period of nine weeks, beginning June 28th and closing August 27, 1948. There were eleven playgrounds in operation with two leaders, one male and one female, in attendance at each playground.

Thousands of children attended the playgrounds and made use of the many facilities.

The number of children who attended the New Bedford playgrounds during the 1948 season established a new high record for this recreational program. Average weekly attendance for the season about 15,000.

Leaders termed the season a most successful one, packed with activities from the opening of the playgrounds in June to the closing in August.

Every Wednesday afternoon was set aside for the field events, the winners later participating in the grand field day at Buttonwood Park.

A spelling bee was held at each playground, the finals taking place on the stage of the Olympia theatre.

Handicraft had many devotees and the many articles made were on display in center stores. Scrapbooks that were displayed were afterward sent to nearby hospitals for child patients.

Winners in the field events met at Buttonwood Park for championships of the city. Ball throwing, hitting for distance and track events were included. The all day affair closed with the baseball playoffs for the senior, junior and club championships.

Each Friday throughout the season a special contest was held, the winners on each playground meeting at the Free Public Library steps to be judged for the best in the city. Doll and doll carriage parades, freckles contest, were among the many events.

Winners of the various events during the season were guests of the New Bedford Lodge of Elks at a banquet in the lodge rooms. Chicken pie was served, followed by plenty of ice-cream. The children afterward put on a show for their hosts.

The disabled American War Veterans sponsored a trip to Lincoln Park for the playground youngsters. Picnic lunches and rides on the amusements were enjoyed by more than four hundred children who made the trip.

Knitting classes were held and several shawls were contributed to the "Share a Shawl" project for needy people in Europe. The instructors in this knitting class were assisted by many adults who visited the playgrounds.

Many merchants and other business concerns, by contributions in prizes and materials, helped to make the playground season a success.

We had perfect playground weather with not one day of rain.

YOUTH ACTIVITIES

Membership in the Youth Centers increased greatly during the year 1948, and the year proved to be the best in this recreational program for the young people in New Bedford. Nightly average attendance was about three hundred.

A drive for more members has been announced. The annual election of officers for 1949 was held in December.

The members of the Mary B. White Center enjoyed all kinds of games, pool, ping pong, checkers, cards and bowling. Contests were held each week.

At the West End Center, in charge of Mr. Ernest Newby, a council was established to set up rules and regulations. At the Center in this section of the city dancing proves to be most popular. The West End Center being for the young colored people, the boys are very much interested in boxing, so have instructions in this manly art under a very able instructor who gives his services at no cost to the organizations. The boys are trained for participation in the Golden Glove Tournament, sponsored by the Standard-Times.

Ping pong and card games are also popular in the West End Youth Center.

This Center celebrated its fifth anniversary in December with a banquet.

The Mary B. White Center was crowded nightly. Four large rooms, which were sponsored by the Lions, Kiwanis and Rotary Clubs are used every night. Thursday night of each week the Boy Scouts use one of the rooms for their meeting.

One night a week is given to talent shows and group singing, and another night to showing moving pictures. Roller skating parties were held every Friday night.

A series of dances were held for the members of this Center with music provided by Local 214 of the Musicians Union through the courtesy of its president and secretary.

Football teams representing the Centers played against many of the city teams, and the West End Youth Center played a victorious game in Newport, R. I.

For the year 1948 the local aerie of the Fraternal Order of Eagles gave the use of its hall for the Youth Centers' basketball games, and we hope the hall will be available again in 1949.

For Thanksgiving day and Christmas day the young people of both Centers donated meat and groceries for baskets which they gave to needy families in the city. For this charitable act, which was done without any suggestion from the recreational leaders, much credit should be given them.

All holidays were celebrated with a dance and social for all the members.

In concluding I wish to thank all the clubs, merchants and individuals who helped to make the Youth Centers enjoyable for the young people.

I also wish to express my appreciation to my assistants for their splendid cooperation in conducting the activities of this division.

Respectfully submitted,

ALAN GRIMSHAW

Supervisor of Recreation and Athletics

OF THE

PLANNING BOARD

NEW BEDFORD, MASSACHUSETTS

For the Year 1948

PLANNING BOARD REPORT

City of New Bedford

January 1, 1949

To the City Council of the City of New Bedford.

Gentlemen:

The Planning Board submits its annual report for the year ending December 31, 1948.

Five meetings were held during the year, all of them for the purpose of holding hearings on petitions for changes on the zoning map.

The following table shows the changes applied for and the action taken by the Planning Board and by the City Council.

PLANNING BOARD

Twenty-third Annual Report

OF THE

BOARD OF APPEALS

NEW BEDFORD, MASSACHUSETTS

For the Year 1948

BOARD OF APPEALS

City of New Bedford

January 1, 1949

To the City Council of the City of New Bedford.

Gentlemen:

The Board of Appeals submits its annual report for the year 1948.

Meetings were held on the first and third Wednesdays of each month except when there were no appeals.

Eighty-nine appeals, eighty-five under the zoning ordinance and four under the City Building Code were received for consideration during the year. Sixty-eight of the zoning appeals were granted, twelve denied, and five withdrawn. The board reversed the decision of the Superintendent of Buildings on two of the four appeals under the Building Code, modified one, and affirmed one.

Twenty-six attic tenements were permitted under the provisions of Chapter 222 of the Acts of 1948 General Laws accepted by the City of New Bedford April 24, 1948, entitled "AN ACT Temporarily Relaxing the Terms of Ordinances or By-laws Restricting the Use and Occupation of Two and One Half Story Houses, So Called."

A summary of the cases, with the action of the board thereon, is set forth in the following table.

BOARD OF APPEALS

9 r

No.	Nature	District	Location	Action
967	Add dormer to nonconforming 3-family dwelling -----	Residence B	County St.	Granted*
968	Alter 2-family house for 3-family use (attic tenement)	Residence B	Liberty St.	Granted

Extra hours of duty	68

Service in the various stores through the city during rush periods and in the daytime, also in the stores evenings during the Holiday Season. I have attended Criminal, Juvenile, and Superior Court Sessions; visited the various cafes and dance halls, attended Police-woman's Conferences and have given talks before Church, Club and Social Groups in this city.

Respectfully submitted,

ALICE W. DUPUIS

PATROLMAN NAPOLEON O. MASSE, Retired
Died December 27, 1948
Age 55 years, and 4 days

REMARKS AND RECOMMENDATIONS

In presenting my report for this year, I desire to recommend the installation of traffic lights at the most important intersections. The increase in the number of motor vehicles has resulted in many bottlenecks and at times traffic remains at a standstill. This condition will not improve as the number of motor vehicles increase.

I also desire to go on record as recommending the installation of parking meters in the center, and at both ends of the city in the business districts. It is my opinion that the installation of parking meters will relieve our parking situation better than any other method of enforcement.

The department is greatly in need of additional personnel. Men are being retired and no replacements are being made. The appointment of additional personnel to bring the department up to its normal strength is an absolute necessity if the department is to function properly and keep crime down to a minimum.

The motor equipment in the department is in fairly good condition and the two-way radio system is giving most satisfactory service.

The city has been quite free from serious crimes or violence during 1948 and New Bedford stands very high in the matter of safety records in comparison with cities of the country of over 100,000 population.

At this time I wish to thank His Honor, the Mayor, the City Government, the Press, the Radio broadcasting station, and the Public for the co-operation given to this department during the past year.

JOHN W. DAVIES,

Chief of Police

Charles A. McAvoy

Social Work Supervisor

To His Honor the Mayor and the Members of the
City Government of the City of New Bedford:

Gentlemen:

The annual report of the Board of Public Welfare for the year 1948 is herewith submitted.

The gross expenditures for 1948 were \$2,979,246.92, an increase of \$379,372.69 over the 1947 expenditures. The distribution by programs shows that Old Age Assistance costs represented 78.4%, Temporary Aid 11%, Aid to Dependent Children 7.1%, and the City Infirmary 3.5%.

The three categories of public assistance continued to show increases with the Old Age Assistance program increasing \$281,760.13 over the previous year. This sum has been mainly the result of an increased case load, a continued rise in our medical costs and increased budgets as set up by the State Department of Public Welfare. Our medical expenses for 1948 were in excess of \$200,000.00 for this category of assistance alone and the amount is continuing to rise. Our increased case load was mainly the result of a change in employment conditions which resulted in lower incomes for children, thereby changing their status from "legally liable" to "exempt" under our State law. Another factor is that a great many people who reach the age of sixty-five find that the Old Age Survivors' Benefits are totally inadequate and they then apply for Old Age Assistance to supplement this grant. It should also be pointed out that the last increase of 8.3% in the O. A. A. budgets did not become effective until October 1, 1948 which means a substantial increase in the 1949 expenditures.

Temporary Aid, or General Relief as it is sometimes called, showed an increase of more than \$56,000.00 over that spent the previous year. This form of public assistance is usually a barometer of economic conditions and this increase is solely the result of less employment in New Bedford. In fact, for the first time in a number of years, we have had a large number of able-bodied persons receiving welfare over a period of time. The present situation is

not too encouraging and we can expect more applications for this form of assistance as unemployment compensation benefits are exhausted. Another problem that is giving us considerable trouble in this category is delinquency—adult and juvenile—and the broken home. In a great many instances, the breaking up of a family results in an application for some form of assistance due to the fact that the worker living apart must also support himself. The cooperation of the Court and Probation Office has helped in keeping this added cost at a minimum.

The Aid to Dependent Children Division showed an increase of \$32,728.66 over the amount expended in 1947 and will continue to rise in 1949. Like Old Age Assistance, all recipients received an 8.3% increase in their budgets, effective October 1, 1948, and inasmuch as this increase will most likely be effective during the entire year of 1949, this alone will result in a substantial rise. The cost of this category is shared by the Federal, State and local communities. However, unlike Old Age Assistance, the City of New Bedford contributes a larger share than either the Federal or State. Despite this, local governments are subject to the supervision of the State Department of Public Welfare, and, under law, their rules and regulations are mandatory.

The City Infirmary increase amounted to \$8,328.77 and this was the result of additional personnel and considerable work completed by the Superintendent of Buildings. The Board added a registered nurse, two orderlies, a cook and a farmer. This added personnel resulted in added services to the inmates and general all-round improvement at the Infirmary. We should also like to point out that, with the cooperation of the State Department of Public Welfare, we secured the services of one of their dieticians who visited the Infirmary and, after a survey, recommended menus for the four seasons of the year. Her recommendations were accepted by the Board and the Superintendent was instructed to put them in effect immediately. The maintenance of the Infirmary is under the supervision of the Building Department and, as stated above, the Superintendent of Buildings has done considerable work in improving the interior of the buildings.

The Chairman of the Board repeats a recommendation that he has been making for a number of years and that is the integration of all three categories. This integration would result in far greater efficiency by the elimination of all duplication, closer supervision, and a reduction in administrative cost. This has not yet been possible because of lack of space. However, the situation has reached the stage where it is absolutely essential that enlarged quarters be found in the near future. It is a physical impossibility under present conditions to efficiently administer the public assistance program.

In closing, the Board wishes to express its appreciation to the Mayor and members of the City Council ; to Mrs. Herma C. Rowe, director of District VI of the State Department of Public Welfare, and her staff ; to Mr. Raymond J. Engle, manager of the local office of the State Employment Division ; to our local private charitable organizations ; and to the many business and manufacturing concerns who have continued to give us their cooperation throughout the year.

Respectfully submitted,

WILLIAM A. HIGGINS

Chairman

Report of Superintendent

Honorable School Committee
New Bedford, Mass.

Dr. Walker and Gentlemen:

I have the honor to present herewith my third annual report and the eighty-eighth in the series of superintendents' annual reports.

Two items of major interest have been acted upon during the year 1948 namely the single salary schedule and a survey of our school system to determine our building needs.

At the regular meeting of the School Committee held on January 7, 1948, it was voted that a single salary schedule, based on preparation and experience, be made effective as of September, 1948, and that all teachers with fifteen or more years of service in the New Bedford School Department be placed on the bachelor's degree level.

Under the new schedule the minimum for teachers with a bachelor's degree will be \$2100 per annum and the maximum \$3400. Teachers holding master's degree will begin at \$2300 and reach a maximum of \$3600. Yearly increments under the new schedule will be \$130.

Teachers now in the department who do not hold a degree and have less than 15 years' teaching experience will reach a maximum of \$3300.

Administrators, supervisors and principals will receive proportionate increases in order that existing differentials be maintained.

Teachers now on the maximum under the old schedule will advance in five steps until the new maximum is reached in September, 1952.

This new schedule brings our teachers' salaries more in line with those now paid in other cities of comparable size and in part at least will help them keep pace with increased living costs.

A well trained and well paid teaching staff constitutes one of the most effective guarantees of an upright, capable and loyal citizenry.

Thoughtful people throughout the country have become concerned over this matter as never before. The result has been a marked postwar trend toward higher salaries which has long been overdue.

At the meeting of the School Committee April 23, 1948, crowded conditions in the center schools was a subject of discussion. The superintendent recommended for the consideration of the Committee the transfer of seventh and eighth grade pupils of the grammar schools to the junior high schools and he suggested appointment of a subcommittee to plan a long range building program. He recommended an adequate survey of all buildings and facilities to establish a plan of construction for the future that would be within economic limitations.

It was voted that the Mayor and City Council be requested to provide sufficient funds for the erection of a central junior high school; that the Mayor be requested to procure funds for a professional survey of the school system that would show the need for new schools; that parents who desired their children to attend junior high schools instead of the grammar schools could make such arrangement with the Superintendent.

At a School Committee meeting May 12, 1948, it was voted that Dr. Homer W. Anderson be appointed to make a building survey of the public school system.

As a result of a preliminary report made by Dr. Anderson at the meeting of the School Committee held on November 10, 1948, it was voted to go on record in favor of the

addition of six classrooms and a gymnasium at the Betsey B. Winslow School, the addition of four classrooms at the Horatio A. Kempton School and the construction of a junior high school on land north of Sargent Field and west of the School Department Storehouse and that the Superintendent obtain the necessary details and present them to the School Committee as soon as possible. It was further voted that the Mayor and City Engineering Department determine the area of the land owned by the City of New Bedford on the proposed junior high school site and if it is found to be adequate, the property be turned over to the School Department.

As this report is being written the building plan heretofore presented has reached the architectural stage and the request for bids for such services will soon be advertised.

During the past year the New Bedford School Department lost by retirement the services of two employees of long and faithful service.

Mr. Ralph Covill, Chief Supervisor of Attendance, retired on October 31, 1948 after thirty-six years of outstanding service to the boys and girls of our schools.

On December 1, 1948, Miss Viola C. Manseau retired as Head Clerk and Superintendent's secretary. It would be extremely difficult to adequately measure the value of the many contributions Miss Manseau has made to the progress of the New Bedford School Dept. during her thirty-seven years' tenure. Both Miss Manseau and Mr. Covill take with them our sincere appreciation of work well done. We wish them long life and happiness in their new-found leisure.

STATE AID

There is little question that the number one problem facing school superintendents today is that of inadequate financial support. Increasing demands on the local real estate tax, which has been practically the only source of school support, make it impossible for administrators to procure suf-

ficient funds to properly carry on the great job of educating our youth.

State Aid for public education has been increased during the past year by approximately \$9,000,000. However, since this money is not earmarked for public schools, it seems we shall have to engage in a civil war with other municipal departments if we are to derive any great benefit from the \$404,000 which should come to this department from State Aid.

In the State of Illinois one proposal to be presented to legislators will recommend that the school board be not only completely responsible for the budget but also for its own tax levy. There is considerable merit in this proposal if the tax levy is not to be on real estate.

The Massachusetts Council for Public Schools is calling for a \$25,000,000 increase in State Aid to become effective in January, 1950. This bill known as Senate Bill 130 makes no recommendation for tax source and if it should become law would increase New Bedford's State Aid by \$552,000 over the present \$404,000.

DEPARTMENT OF SECONDARY SCHOOLS

TEXTBOOKS AND WORKBOOKS

During the school year 1947-1948 the English Committee for the junior high school graduates appraised a large number of modern textbooks for the purpose of determining the advisability of replacing one or more books that now implement the courses of study in grammar and composition. After careful consideration the committee selected a number of books for each grade to be referred to the teachers of English for final consideration. One book for grade seven and one book for grade eight were chosen to be used on a trial basis for one year before arriving at a decision on adoption. Accordingly two sets of the books in each grade are now being tested. The votes of the ninth grade teachers were so scattered that the committee decided to defer action on the selection of a book for this grade until more careful thought can be given to the subject.

The Social Studies Committee for the junior high school grades has had under consideration the desirability of recommending modern textbooks for geography in grades seven and eight. Opinions have been obtained from superintendents of schools in thirty-four communities in Massachusetts and ten cities outside the Commonwealth, from individual teachers and associations of teachers of social studies, from authors and publishers of textbooks. It is expected that specific recommendations will be forthcoming before the close of the school year in June 1949.

JUNIOR ACHIEVEMENT

During the school year 1947-1948 twenty companies were organized among the pupils in the high schools of this vicinity. Ten declared dividends of 20% or more, five broke even financially and four failed to declare a dividend. One company did not finish the year due to the retirement of its sponsor from business. The nineteen companies that completed the year were as follows:

<i>Name of Company</i>	<i>Product</i>	<i>Capital- ization</i>	<i>Sponsor</i>
Aero Metal Co.	Jewelry	\$100.	Aerovox Corp.
Chemco, Inc.	After-shave Lotion	100.	Aerovox Corp.
Modern Plastics Co.	Plastic Pin-up Lamp	125.	Aerovox Corp.
Modern Art Co.	Moulded Bookends	100.	Atlas Tack Corp.
Junior Press	Job and Specialty Printing	250.	C. F. Wing Co.
J. A. Artkraft Co.	Hand-hammered Copperware	100.	Continental Screw Co.
Plas-Teens Co.	Plastic Cigarette Box	100.	Cornell Dubilier Electric Corp.
Air-o-Rubber Co.	Rubber Seat Cushions	100.	Goodyear Tire and Rubber Co. of Mass.
Junior Craftsmen	Wooden Table Lamp	100.	Hathaway Mfg. Co.
Kandy Kidds, Inc.	Candy	100.	Household Furnishing Co.
J. A. Broadcasting Co.	Radio Entertainment	100.	Jr. Chamber of Commerce
Cosmo Chemical Co.	Hand Lotion	100.	Merchants National Bank
Plastics Novelty Co.	Plastic Tablecloths	100.	Monarch Clothing Co.
Kleen-Rite Chemical Co.	Window and Lens Cleaner	100.	Morse Twist Drill and Machine Co.
Talent Unlimited	Radio Entertainment	200.	N. B. Gas and Edison Light Co.
J. A. News Co.	Newspaper Writing	75.	N. B. Standard-Times
J. A. Metal Arts Co.	Costume Jewelry	300.	Revere Copper and Brass, Inc.
Seroco Novelty Co.	Novelty Pins	100.	Sears, Roebuck and Co.
Wamico Woodcraft Co.	Wooden Sewing Aid	125.	Wamsutta Mills

Three New Bedford High School pupils, Miss Claire A. Costa, Miss Sheila M. Alpert and Miss Kathleen M. Stevens, are now attending college on partial scholarship grants as a result of their scholastic achievement and outstanding activity in their Junior Achievement work.

During September of 1948 Junior Achievement was presented at assembly programs in five greater New Bedford schools on the secondary level. Applications received totaled 527 of which 214 were from New Bedford High School. The basement of the Clarence A. Cook School was placed at the disposal of the various companies to provide a suitable meeting place for the teen-agers. Indications point to a steady expansion of the program both in the number of young people who are attracted to this type of training in business education and in the quality of performance.

The following table indicates the growth of Junior Achievement in this city since its beginning in September 1946.

	1946-47	1947-48	1948-49
Number of companies	14	20	18
Number of students involved	191	325	450
Number of applicants	247	503	527

It is of interest to recall that the June 5, 1948 issue of the Saturday Evening Post featured an article on the growth of Junior Achievement in New Bedford. Two years of experience have demonstrated that this project offers high school students many worthwhile opportunities for the use of their leisure time.

CAFETERIAS

COMMUNITY SCHOOL LUNCH PROGRAM

<i>Type A, Without Milk</i>	1946-1947	1947-1948	Increase	Decrease
Number of schools participating	3	3	None	None
Number of meals served	136,401	105,192		31,209
Reimbursement from U. S. Dept. of Agriculture	\$9,548.07	\$5,839.02		\$3,709.05
<i>Type C, Milk Only</i>				
Number of schools participating	34	34	None	None
Number of half-pints served in schools:				
With cafeterias	379,538	337,293		42,245
Without cafeterias	479,049	379,391		*99,658
Totals	858,587	716,684		141,903

*Decrease due to fact that program operated 8 mos. only instead of 10 months as previously.

At a meeting, April 14, 1948, the School Committee approved a recommendation for the purchase of an electric coin counting and wrapping machine to replace a similar hand-operated machine that had been in service for twenty years.

A report from Lipschitz and Selig, Public Accountants, for the audit of the profit and loss statement for the year ending August 31, 1948 and of the balance sheet as of August 31, 1948 was presented to the School Committee August 25, 1948. This report confirmed the figures contained in these statements.

Beginning October 1, 1948 the School Lunch Program was extended to include the Girls' Continuation School.

REGIONAL VETERANS' EDUCATION CENTER

On the assumption that the educational needs of the veterans could not be adequately met locally, but would require the establishment of regional schools, and the further thought that one of the best plans for meeting these needs was supervised correspondence instruction through University Extension, Mr. Julius E. Warren, Commissioner of Education, invited representative school men to attend a meeting in his office July 12, 1945, to make plans for such a program and to consider ways and means of implementing it. As a result of this all-day conference, which was attended by Mr. Murdy, the local Regional Center that was opened three months later was one of a number that began to function in accessible locations throughout the Commonwealth.

Since experience and observation in the counseling of veterans indicated that in this work there would be a serious need for a very practical application of the principles and practices of guidance, it was particularly fortunate that in September of 1945 there began to function in the New Bedford School Department a Division of Guidance and Placement in cooperation with the Massachusetts Department of Education, for it was of great assistance to the veterans of World War II who desired to resume their education in the Regional Veterans' Education Center.

The New Bedford Center ceased operations September 16, 1948 due to insufficient attendance after having served the needs of the veterans for two years and eleven months. Throughout its existence the tutorial type of instruction was the prevailing practice because it best met the needs of the students. Many of them expressed their appreciation of the privilege of studying as individuals under the supervision of their instructors who often declared that in this area the individual method of instruction was the most practical. Every effort was made to help each veteran find his place in civilian life. Blind academic restrictions and traditions were never permitted to stand in the way of this important objective.

EVENING HIGH SCHOOL

Sessions began October 6, 1947 and closed March 22, 1948. Classes were taught in English, Spanish, Portuguese, Mathematics, Stenography, Typewriting, Bookkeeping, Civil Service, Art and Music. Facilities of the Division of Guidance and Placement were available. From a total enrollment of 862 there were 530 who left leaving an enrollment on the closing night of 332. Certificates for satisfactory scholarship were issued to 178 students who attended at least eighty per cent of the forty nights.

On October 4, 1948 the general administration of this school was transferred from the Department of Secondary Schools to the Department of Adult Education in order to centralize the control of all evening schools in the latter Department.

DEPARTMENT OF ELEMENTARY SCHOOLS

"The elementary school is the melting pot of America. To it come all the children of all the people. Within its walls the children learn to live and work and play together. It is the institution which begins the process of socializing the child in order that he may become a useful member of society."

In the New Bedford elementary schools this year there are approximately eight thousand pupils with an increase in the number of pupils entering grade one over 1947.

In September 1948 one-session Kindergartens were opened at the Merrimac Street School and the Abraham Lincoln School. Each school has an enrollment approaching thirty pupils and provides a year of adjustment to social living within the school which builds a readiness for beginning school life of grade one. Miss Marjorie E. Hawes, a graduate of Wheelock College, is teacher of both classes. There are now eighteen full-time kindergartens and two part-time kindergartens.

There are at the present time fifty-four first grade classes in the elementary schools of New Bedford — four more than in September 1947. Fifteen of these classes have more than thirty-five pupils enrolled. The group mental tests and reading aptitude tests given each pupil early in the school year, not only reveal the pupils who have a readiness to begin the work of grade one, but also the learning difficulties of individual pupils. It is imperative that each pupil receive specific attention for his particular difficulty on this level if he is to begin his life in the elementary school with satisfaction. This is impossible with classes of this size in some sections of the city where many pupils have learning difficulties. It is hoped that more first grade teachers will be available as enrollment increases.

In September 1948 the Cumulative Record Card, written by Miss Susan E. Shennan, Director, Department of Guidance and Placement, following conferences with a committee selected from all levels of the School Department was introduced into the Kindergarten and grades one, two, and three. As the name implies, the cumulative record card is a history of the child's progress from Kindergarten through High School.

The revised elementary school report cards are being used this year. Items which measure school success in terms of citizenship and work habits have been modified, and added scholarship mark is given, and levels of achievement in reading have been indicated throughout the primary unit. Reports from parents and teachers lead us to believe that both the wider range in the marking system, and noting on which level the pupil is reading in the Primary Unit, is appreciated by both home and school.

The "Making Sure of Arithmetic" series introduced into grades one, two, and three in 1947 has been extended to grades four and five this year. The assistant superintendent in charge of elementary schools has held group meetings with all teachers of grades four and five, for informal discussions of the work in arithmetic. Working with boys and girls in many fourth and fifth grade classrooms she finds the children enjoying their work in arithmetic. The continuity of the series gives each pupil a feeling of successful accomplishment. "The more meaningful the learning, the greater the promise of success." The texts will be extended to grade six during the next school year.

Before the close of school last year each third, fourth, fifth and sixth grade teacher was invited to send to the English Committee of the elementary schools three questions based on the course of study for their grade level. The members of the English Committee and a few teachers selected from each of these grades are studying this material and from selected questions, tests are being written. As a result of the cooperative effort of teachers and the English Committee, tests based on the New Bedford course of study will

be available for all pupils in grades three, four, five and six before the close of the school year in June.

Many teachers and principals are becoming increasingly interested in the correction of speech defects of boys and girls in the elementary school. The children having minor speech defects, as well as those having more serious speech defects, are brought to the attention of the assistant superintendent at the time the Census of Physically Handicapped Children is compiled.

A Harvard-Boston University Extension Course, "The Improvement of Speech" given by Dr. Wilbert Pronovost of Boston University, is being planned for the second semester. It is hoped this course will be of interest to many teachers and principals in the New Bedford School Department.

Last September six graduates of Liberal Arts Colleges with no teacher training on the elementary school level were assigned to work for one year as cadets with teachers of successful teaching experience. As we observe these teachers and cadets working together we feel assured of having six well trained teachers to add to the teaching corps of the elementary school next September.

It is encouraging to note the interest of boys and girls in elementary science in many classrooms during the past year. This interest has been aroused through field trips, use of visual aids, experiments, training in observation and reading to obtain information. Suggestions for Classroom Teachers in Teaching Elementary Science, a bulletin published by the United States Office of Education has this to say concerning reading in relation to science, "Reading is a learning tool of which all science teachers should be aware. Developing skill in reading and learning in science can go hand in hand. But reading is only one of the ways to learn science. To over-emphasize its use is to ignore some of the essential purposes for teaching science. To learn science, to enjoy it, and to make it functional in the lives of girls and boys it must leave the pages of a book and get into their daily experience."

The choice of social studies texts is always a challenging one. The Social Studies Committee is making a study of the underlying philosophy of the newest fifth and sixth grade history texts. To aid the committee in its study trial sets of histories are being used by the children in two fifth grade classrooms. A recent bulletin says, "History at the elementary school level should be the story of changing patterns of human living. One of the major purposes of any social-studies material should be to emphasize the obligations and privileges of responsible citizenship. We wish to help each pupil to comprehend something of the rich heritage of this American culture and realize his responsibility for maintaining our American way of life." The committee is planning to recommend a history to be introduced during the coming school year.

Once again we wish to express our appreciation to the members and chairmen of the curriculum and text book committees who give efficient and effective service in the selection of texts and in writing the course of study. Their work with the children in the classroom gives them an understanding of the needs of the pupils which is invaluable.

The elementary school has always required of a teacher a well grounded knowledge of subject matter. Subject matter alone cannot educate. Today, added to this knowledge of subject matter, the elementary teacher has a knowledge of child growth and development, discovers the children's interests, appreciates each pupil's limitations and has a hand in the selection and organization of the content of the elementary school curriculum. As the curriculum is broadened to include the enrichment which contributes, not only to the training in skills and subject matter but also to the development of wholesome personalities, it becomes apparent that the time schedule now in use in the elementary school demands study and revision. A committee is at work studying the possibilities of preparing a block schedule which should be an aid in improving the growth of the whole child.

MAINTENANCE DEPARTMENT

Building Maintenance

Roofing

Roofing repairs were made at the following schools:

Normandin, Hannigan, Roosevelt, Parker Street, High, Thompson Street, Dartmouth Street, Mt. Pleasant, Lincoln, Ashley.

Most of the damage to the roofs was caused by the high windstorm of last March.

Ceilings and Walls

Extensive repairs were made to walls and ceilings in many of our schools. It may be necessary to install some new ceilings the coming year.

Electrical Work

Lighting Fixtures

New lighting fixtures were installed in every room of the Cedar Grove Street School. We are continually improving lighting conditions in schools as time and money permit.

Repairs to motors, clocks, bells and much related work has been done in all our schools this year.

Carpentry

A new floor was laid in the new kindergarten at the Merrimac Street School.

New outside doors were installed at the Roosevelt, new basement step treads were installed in the Cedar Street School.

As usual broken windows are still a problem to us.

Pupils' desks were resurfaced in nine rooms at Normandin, one in the Knowlton and five in the Roosevelt.

Painting

The weather held up our outside painting program this year and one of our painters was out ill seven weeks. However, we did complete the Normandin and Hannigan schools.

A great amount of interior painting was done at the following schools:

Cedar Street, High, Hannigan, Taylor.

EQUIPMENT MAINTENANCE*Heating and Ventilating*

Two new boilers were installed in the Parker Street School. All other heating and ventilating equipment has been checked and repairs made where necessary.

Plumbing

All plumbing fixtures, gutters, conductors and yard drains have been put in good condition.

A new water main was put in the Cedar Grove Street School, also new sewer piping and check valve were put in the Dartmouth Street School to prevent the street sewer from backing up into the building.

Window Shades

Window shades are continually being replaced and the colors standardized.

It is hoped that all the damaged shades in the junior high schools will be replaced this coming year.

Stage Equipment

Much work was done this year at the High School on the stage equipment. It is intended to further improve the stage curtains and equipment there. We also would like to enlarge the stage at the Winslow and improve the stage equipment at the Ashley School.

School Yards

Many of our school yards need resurfacing and grading. The following yards were repaved this year with yard gravel: I. W. Benjamin, Thompson St. and Phillips Avenue Schools.

Masonry

Two chimneys and brickwork were repointed at the Merimac St., H. A. Kempton, High, Cedar Grove St. and Ashley schools. Much more pointing up work remains to be done next year.

Power Dept. at High School

No. 3 Engine was completely overhauled this year. All other equipment was checked and repaired where necessary.

In conclusion — owing to the possibility of closing the following schools in the future — Phillips Avenue, Cedar Grove St., Clark St., Cedar St., Parker St., Thompson St. and Taylor — no major repairs are contemplated in these buildings next year other than emergency work.

The major improvements expected to be completed next year are as follows: resurfacing many school yards, if possible; laying new floors in several of our schools, painting buildings inside and outside where necessary; repairs to brick work, new copper gutters, conductors, complete roofing repairs on several buildings yet to be designated.

With the help of an additional carpenter a great deal of school furniture can be refinished and other related work done.

DEPARTMENT OF VOCAL MUSIC

We are privileged to live in a land where "more music is made and heard by more people than anywhere else on earth." In an incredibly short time modern invention plus American prosperity have given music to the millions. Within the same few years music education has been brought face to face with two tremendous problems — that of appraising and adapting these new resources, and, at the same time, that of revealing to boys and girls reared in a machine age the rich satisfaction that comes only from creative self-expression and active personal participation.

Broadly conceived, these are not separate problems, but resolve themselves into the planning of a comprehensive program of musical activities, tied as closely as possible to contemporary life and made sufficiently varied to interest children of differing abilities and unlike backgrounds. This program should give to our boys and girls the opportunity to taste and enjoy many kinds of music, in many different situations. They should sing it, dance to it, listen to it and talk about it, until from experiencing much that is good they learn to prefer the best, and from doing and enjoying, to develop and improve the skills so necessary to musical growth.

This is a large order and the music department claims only a start towards its attainment. Previous reports have recorded the introduction of modern texts, courses of study enriched and revised toward present day needs, the expanding high school curriculum, some few beginnings in the field of listening and the progress of the several glee clubs on elementary, junior and senior high school levels.

This year the new fifth grade course, built with the aid of a teacher committee, was accepted during the summer and distributed in September. New sixth grade texts are under consideration and teachers in four schools are testing trial sets. After the holidays the sixth grade course of study committee will prepare a tentative course for that grade, thereby

completing the revision of the elementary curriculum. Beginning this September an experimental project, under close supervision of the music staff, is under way in four schools leading toward the day when more listening can be introduced in the elementary schools. However, it is already apparent to those concerned that the first handicap is time, and that for the present at least any expansion of the music program must be severely limited.

New glee clubs have been formed at the Hosea M. Knowlton, the Abraham Lincoln and the Robert C. Ingraham Schools, directed respectively by Miss Shirley M. Fellows, Miss Nora F. Aylward and Mrs. Mary M. Harrison.

In the senior high school, in addition to the usual courses and extra curricular choruses, there is a newly formed vocal class for students of voice. In order to avoid program conflicts this course is offered from two to three o'clock Friday afternoon.

It is good to report the return of Miss Janet A. Ratcliffe, absent for a year of study. Miss Ratcliffe has made herself an invaluable member of the music staff not only in the high school which now occupies the major part of her week, but also in the elementary school where though her time is limited, her experience and enthusiasm help leaven the department.

During Miss Ratcliffe's leave of absence, the high school was unusually fortunate in securing Mr. Walter W. Bonner as substitute. Mr. Bonner is an excellent teacher and musician, and the classes were carried forward competently and without loss of standards. Under his care our high school chorus again won distinction Music Week and was judged "superior" at the Massachusetts Festival in Brockton. This year Mr. Bonner continues to contribute extra curricular services as director of the male chorus and as coach to several small ensembles.

Recommendations: In the senior high school the auditorium stage is obviously unsuited for classes, and a properly

equipped music room with storage place for material is badly needed. Again, General Music and Chorus are background courses which should be open to every boy and girl in the school. As programs are now scheduled, enrollment in these classes is limited to those students whose free period happens to coincide with the course they choose to elect. Until this condition is remedied, music is effectively barred to a goodly percentage of the student body.

For the two junior high schools and the elementary grades, music asks more time. The school day is already crowded to the limit and this is not to be granted lightly and without good reason. The problem is not local. All over the country educators are re-evaluating subjects in terms of children and their essential needs. We know that we live in an industrialized civilization where spiritual values are too often forgotten in the push for vocational specialization. Moreover, educators readily acknowledge that our schools and colleges have stressed intellectualism and the measurable skills to the point that multitudes of so called educated persons have only the crudest and most inadequate resources for emotional enjoyment, expression and fulfillment. And finally, and most urgently, democracy is making its fight for survival, and the school is one of its surest strongholds. But understandings, the eternal verities of human needs and man's right to freedom can be made meaningful only through the language of feeling. Music speaks that language and is one of the most potent forces at our command. Yet an insufficient time schedule can render it helpless and sterile. It is not proposed that time alone will give us the ideal curriculum, but without it we can scarcely hope to do our part in restoring the order, beauty and unity now sadly missing in the world we live in.

PRACTICAL ARTS DEPT.

"Art is that something to be taught, learned and universally used and enjoyed as are writing, speaking, or other accepted forms of expression."

Art education is a responsibility that all who are engaged in it should feel proved to assume. Those of us who are in it are happy to serve by taking an active part in helping to mould the child's life and enrich his background. We feel quite happy too about being a part of that group of educators whose primary purpose is the propagation of the beautiful as a practical and functional element in the life of the school child. The child must have the opportunity to satisfy not only his physical needs but his aesthetic and emotional ones as well.

"In a civilization like ours, good music, good literature, and the arts are needed as never before." In this age of technology and realism we shall need the emotional experience which we find in the great music and art of the world. When our citizens feel this aesthetic need and give expression to it the community reflects it in them and their environment. The knowledge gained in the art classes is functioning in the lives of a great number of people.

"The Art Education that has been taught in the schools of this country for over a hundred years though it may have been good, bad or indifferent, according to present standards is at last manifesting itself." The number of people who have had Art Education has finally reached such a figure, and their knowledge of color, design, form and line is being reflected so much in their demands for these qualities in the products they buy that merchants are becoming aware of it. This factor is playing an important part today in the manufacture and merchandising of goods.

PERSONNEL

Mr. G. Philippe DeRosier, instructor of Mechanical Drawing and Crafts at the High School, resigned in June of this year in order to study at Yale University. He became a member of the Art Department in September 1941. Mr. DeRosier was on leave of absence because of military service from November 1942 until his return in May 1946.

As a result of the vacancy Mr. Bertrand E. Davies, instructor of Mechanical Drawing at the Roosevelt Junior High School, was appointed to fill the position at the High School. Mr. Davies comes into his new position well prepared for he has had a wide field of practical experience in the subject he is teaching.

MECHANICAL DRAWING

The physical setup of the Mechanical Drawing Department at the High School is gradually taking shape. A new supply cabinet designed by this department and made by the school carpenters has been used to good advantage. The Celotex Boards for display of students' work are all in place. Mr. Davies has been very cooperative in carrying out suggestions offered. He and some of his students are sanding, painting and varnishing the adjustable stands, stools, metal cabinet and other furniture in the room. When finished this room will furnish a pleasant and business-like atmosphere for the students of this department.

In time the old sets of drawing instruments must of necessity be replaced with new ones when good reliable material is again available.

MATERIALS AND SUPPLIES

A general survey of materials and supplies is being continued. Gradually watercolor boxes, water pans and other materials made of tin will have to be replaced now that they are becoming available again. Because of the inferior qual-

ity of some materials during past years purchases were kept down to a minimum. Last year no watercolor brushes were bought due to the very poor quality. However, it was necessary to buy some brushes of a better quality this year.

The inferior quality of the dry cake watercolor paints used in grades 4, 5, and 6 has gradually become worse and proven so unsatisfactory that it has become necessary to replace them with the semi-moist paints as has been recommended. Only two cities in Massachusetts have been using these dry cake paints up to this time, New Bedford being one of them. Manufacturers have discouraged their use for some time because of the poor quality. The difference in cost, however, will be made up in the long run because all of the semi-moist cake can be used whereas the hard cake deteriorated, crumbled and had to be discarded. The hard surface was of such a nature that children had to scrub the paint thus shortening the life of the brush.

SPECIAL WORKS

Junior Red Cross — as in past years the public school children of New Bedford have responded to the annual appeal of the New Bedford Chapter of the Red Cross again this year. This material is distributed to the several military hospitals in this area and is greatly appreciated by the recipients. The officials are warm in their praise of teachers and pupils alike for their kind cooperation in this very worthy program.

Wall Decorations — With the cooperation of this department Mr. Louis D. Cook, principal of the Parker Street School, who is very much interested in room decoration, has purchased a number of beautiful pictures for each classroom. Old frames were recut to fit the new prints and then refinished. Murals made by the eighth grade graduating class under the direct instruction of Mrs. Winifred Bruce, art teacher for grades seven and eight, were exhibited in the Free Public Library for one week. One of these pieces, the work of two brothers, was worthy of being framed. Now effectively lighted it has a

prominent part in brightening up one of the school corridors. Such projects and such cooperation are most encouraging to this department and should be an incentive for other schools to brighten up many of their classrooms.

Display Boards --- A beginning has been made to meet the need of satisfactory and effective display space in the individual classroom. Temporary wires, strings and burlap cloth certainly do not meet the needs of the modern classroom for exhibiting the work of the pupils in their many varied subjects. Our objective is to have every classroom equipped with a minimum of at least one piece of Celotex, the size of one possibly two blackboard spaces. Many classrooms already have at least one such piece. These Celotex display units have proven so effective that a number of teachers have bought this material personally. This means of visual aid is an absolute necessity in modern teaching.

Public Appearances — Invitations to speak to various groups in the community, such as Mothers Clubs, the Junior Woman's Club, Kiwanis, church groups and young peoples' organizations have been accepted with pleasure by Mr. Vancini during the year.

EDUCATION WEEK

The Art Department again took an active part in the observance of Education Week in November. Whereas last year daily programs were carried on in one of the downtown store windows, in which boys and girls of our schools demonstrated some of their school activities to the public, it was decided this year to have an exhibition of pupils' work on display. This exhibit occupied the entire window of one of our prominent downtown stores during the week. Articles exhibited were contributed by the North and South Continuation Schools, the Workshop Classes and the High School Science Department.

HOUSEHOLD ARTS FOR GIRLS OF THE JUNIOR HIGH SCHOOL

The Household Arts Department for Girls of the junior high school level has increased in the quality and quantity of the products made. The easing of shortages and the ability of the pupils to furnish materials for shop projects has made this increase possible.

The new equipment purchased on the three year replacement plan has resulted in bringing the kitchens of both junior high schools to a higher standard of modern efficiency. The 1948-1949 school year will be the last of the original procurement agreement. Obsolete table burners have been replaced at both junior high school kitchens with modern kitchenette type stoves, providing opportunity for more oven type lessons. A new refrigerator is in use at the Roosevelt Junior High School. It is hoped a new one will replace the old refrigerator at the Normandin Junior High School this year.

Electric sewing machines have been added to the equipment in both the clothing and millinery shops at both the junior high schools. More are needed. Many fine garments, hats and accessories have been made in the shops. Renovations of similar articles, to meet the fashion trends, have been accomplished with remarkable skill. Miss Laura O. Avila of the Normandin Junior High School, in addition to her regular work, has created and maintained with the help of the girls a large wardrobe of costumes for use in the assembly programs.

Miss Barbara Atwood who has successfully carried on the Home Problems classes at the Normandin Junior High School since it opened resigned this year. Mrs. Norma McGee who has been appointed to carry on the course will continue increasing the value of the work so ably done by her predecessor. The work in the shop at the Roosevelt Junior High School continues to grow in interest and results. Both shops need new appliances and equipment to meet the expansion

in household appliances in every day use in the homes of today.

One hundred thirty girls from the eighth grades of the center schools are enjoying their added shop experiences. Two hundred twelve colorful attractive garments and accessories have been made in the clothing shop housed in the Girls' Continuation School. One hundred forty-seven girls who have completed the work in Home Nursing have been awarded Junior Red Cross certificates.

DEPARTMENT OF INDUSTRIAL ARTS FOR BOYS

At the Harrington School shop there are eleven classes of seventh grade boys receiving instruction in elementary shopwork under direction of Miss Leary. These pupils come from the following schools: Rodman, Cook, Parker and Mt. Pleasant. There are ten classes of eighth grade boys attending the Cook School shop and receiving instruction in advanced shopwork under the direction of Mr. Rex.

With the opening of schools in September changes were made in the shop instructors at the Roosevelt Junior High School. When Mr. Davies was transferred from the Drafting Department at Roosevelt to the high school, Mr. Coonan was transferred from the woodworking shop to teach mechanical drafting. Mr. Charles Wilbur was employed and assigned to teach woodworking.

There has been an increase in the size of classes in the machine and print shops this year due to the reduction of the number of eighth grade classes. As there are only five lathes in the machine shops and an average of sixteen pupils to a class, this necessitates the need of more equipment so that all pupils can be given an opportunity to work on and get some experience on the machines. A request for enough money to purchase four bench lathes which would relieve this problem somewhat was, therefore, submitted under "Outlay" in the budget. Also, under "replacement" a request was made for extra money to replace some worn out material in both the Roosevelt and Normandin printshops.

At the Normandin junior high school the eighth and ninth grade classes are fair in size, but the seventh grades in both the Normandin and Roosevelt are large and as all instruction is individual it is quite a problem to give to each pupil the necessary help to which he is entitled. The instructors of electrical and woodworking shops of both junior high schools have worked out a program so that each pupil is given as much individual instruction as possible.

This year the workshops are operating more efficiently due to the increased amount of material that is available. The quality of workmanship improves each year and we hope eventually to reduce the actual amount of hand work done and increase the related and simple technical information and drawing. The Lincoln workshop under the direction of Mr. Perkins is a good example of a balanced program.

We were fortunate this year to buy enough planes and squares to have one of each for our boys in all of our wood-working shops. It is hoped this coming year to purchase enough saws and other needed tools to bring our equipment up to date.

Through the cooperation of General Motors, the ABC's of Tools, a moving picture in technicolor on the use and care of tools, was shown to most of our boys including the workshop and Continuation School classes.

Now that a department of mechanical drafting has been established at the high school we shall soon have a coordinated course in drafting from the seventh, eighth and ninth grades in Roosevelt and Normandin up through the high school. This coordination has been needed for some time.

It is desired in the near future that girls as well as boys will be given an opportunity to have some experience in drafting and shopwork; perhaps a combination of architectural drafting and shopwork; enough experience so that they can understand and be able to read a drawing and some experience in household mechanics.

SPECIAL CLASS DEPARTMENT

In March, the Massachusetts Special Class Teachers' Association held its regional conference in New Bedford for the first time in its history. Many cities and towns of the state were represented. Presenting the theme of the conference, "Helping the Slow Learner", Dr. C. Stanley Raymond, superintendent of the Wrentham State School, addressed the gathering, and Dr. Helen B. Sullivan, professor at Boston University, gave a demonstration of teaching techniques using small groups from a special class.

A commendable exhibit of handwork made in the Boys' and Girls' Workshops and in several Special Classes of our city was displayed at the spring conference of School Superintendents in Bridgewater.

While we had heard of the closing of many mental hygiene clinics throughout the state due to lack of finances or personnel, the extreme seriousness of the situation was not brought home to us until in April, the Child Guidance Clinic serving New Bedford closed. For over twelve years this clinic, under the direction of Dr. Olga Steinecke, has been of invaluable help to our School Department.

Intuitive sympathy on the part of teachers and administrators may suffice for dealing wisely with everyday problems, but in more serious or unusual cases the teacher or administrator may not only fail but even do actual harm by disregarding or misinterpreting certain factors which are influencing the child's behavior.

From the standpoint of both child and school, it is economical to straighten out difficulties at the very beginning of a child's career, because the problems of younger children are easier to resolve than those of older children whose habits are more deeply fixed.

We realize that the child who today exhibits personality problems and behavior deviations may be the delinquent, the

criminal, or the neurotic of tomorrow. The tragic unhappiness which these groups bring to themselves and their families, the damage which they inflict upon society is impossible to measure.

Indispensible to our school system are the services of a clinic directed by a child psychiatrist trained in the diagnosis of children's problems and skilled in providing specialized treatment.

Because the need for this clinical help is so grave, from this city and surrounding cities and towns whose departments were served by Dr. Steinecke, school administrators have met and petitioned the State Department of Mental Health to assist in establishing a child guidance center.

We regret that due to lack of proper facilities, it has not been possible to open a Workshop Class near the center of the city. It is hoped that, with the completion of the proposed buildings, space may be made available in some desirable location.

DEPARTMENT OF PHYSICAL EDUCATION

CORRECTIVE WORK

Fourteen schools have active posture classes this year. The average attendance would be about ten children to a class. Some members are of long standing, while others attain correction in a few months. Children with specific defects, such as underweight, heart condition, asthma and those just returning to school after serious illness are admitted to these classes as rest cases. In schools where there seems to be no way of organizing a class, the worst cases are brought to my attention and corrective exercises are assigned for home use. Cooperation from the home is solicited and although the results are not as good, yet it does offer these children the opportunity of correction. Miss Parker earnestly hopes that the time will again come when every school can arrange for these classes.

GAMES

Since more equipment is now available, our yard work has taken on new life. Nine of the grammar schools have an active competitive inter-class program of softball and box-ball. In many of the schools the equipment is available for before school games. There has been a marked growth in leadership and sportsmanship. The children handle their own games and the intelligent decisions made by some of these young umpires is quite surprising. We endeavor to teach the children to play for the fun and enjoyment of the game; to play the rules to the best of their ability; to accept decisions without argument; and to display good sportsmanship — win or lose.

SPECIAL PROGRAMS

In June the Thomas Donaghy School held a field day at Ashley Park. The outstanding feature was 100% pupil par-

ticipation in all events. American country dances, drills and races made up the program.

A Spring Festival was given by the Betsey B. Winslow School. The theme was International and dances of fourteen countries were presented. Preparation of the work was class instruction; however, the limited size of the stage reduced the number of participants.

The department has contributed to many special programs and assemblies during the year. This we are always glad to do.

Workshop class boys from the Congdon and Knowlton Schools held their annual games of softball and touch ball. The boys look forward to these events and it is hoped that eventually we can have more schools join in this competition.

DEPARTMENT OF HEALTH AND HYGIENE

Dr. Spiva's Examinations — September 1947 - June 1948

	Boys	Girls	Total
New Bedford High School	232	325	557
Roosevelt Junior High School	123	112	240
Normandin Junior High School	160	142	302
Elementary	1375	1383	2758
	-----	-----	-----
Total	1895	1962	3857

Audiometric Tests conducted from Grade 3 through Senior Class in High School:

Number of pupils tested—7,525

Number of pupils deficient in hearing—97

Number of pupils given Lip-Reading instruction—16

New Bedford High School X-Ray Program—Senior Class:

Number of students x-rayed—265

Number of students re-x-rayed—3
(on large film)

Number of students to return for
X-Ray in 6 months—1

A New Audiometer

Through the acquisition of a new, modern type audiometer, not only will all children in both elementary and secondary grades be examined for auditory or hearing losses, but this instrument will enable both group and individual testing to be accomplished, thus detecting losses at a much earlier stage and preventing serious and possibly permanent auditory handicaps.

This will also bring about closer integration between the home and the school, and establish a better understanding

of the educational facilities offered by the Departments of Education and Public Health.

Chest X-Ray Survey.

The students in the senior class of the New Bedford High School participated in a mass X-Ray Chest Survey, through the cooperation of the Department of Health and Hygiene with the Division for the Control of Tuberculosis of the New Bedford Board of Health.

Parental permission was obtained and the students were x-rayed at the Olympia Building, in which the Tuberculosis Clinic was located. This program seems more satisfactory, due to the fact that, it is not necessary for the student to disrobe, nor is any skin injection necessary, thus eliminating the "fear-complex," present in former surveys. It is anticipated that students in the ninth grades of the Normandin and Roosevelt Junior High Schools will be included in the next survey to be conducted.

This will enable health authorities to check these students not only while they are in school, but also before they go out into the industrial field to mingle with the population at large, thereby insuring their own health as well as the health of the community.

Physical Examination

All students entering the New Bedford School Department, from private schools in New Bedford and students entering from schools outside of New Bedford were included in the annual physical examination.

In addition to the above mentioned students, the students in the "General Health" class were examined biennially.

All minors between the ages of 14-16 years of age were examined for Industrial Certificates each time they changed their work for a new employer.

Candidates for Football, Track, Basketball, R.O.T.C., G.A.M.S. were all examined physically in order to qualify for their respective electives.

In regard to the over-all program, better correction of physical defects has been possible due to closer integration between the school and the home, along with increased finances in the home.

Recommendations of Dr. Spiva

- 1—At this time, he would recommend that each individual on joining the staff of the New Bedford School Department present evidence of a physical examination, as well as a negative chest x-ray, followed by a chest x-ray every three years up to the age of thirty-five and every five years thereafter.
- 2—Appointment of a health co-ordinator.
- 3—Organization of a Central School Health Council, integrated with that of a:
 - 1—School Health Council of the Elementary Level.
 - 2—School Health Council of the Secondary Level.
 - 3—Community Health Council.
- 4—Appointment of a full time Staff Nurse, to serve as a substitute in both the elementary and secondary schools to eliminate neglecting and seriously handicapping the elementary schools, from which the nurses are removed in order to provide a substitute for the secondary schools.

DEPARTMENT OF ADULT CIVIC EDUCATION

During the year 1948, the Adult Civic Education Department accomplished the following objectives:

- 1—Organized classes in English and Citizenship to enable foreign born residents to qualify for the federal examination.
- 2—Encouraged newly made citizens to return to school to improve their English and to take a more active part in civic affairs.
- 3—Cooperated with the Massachusetts State Department of Education, Division of University Extension and Division of Vocational Rehabilitation, in providing education for handicapped adults.
- 4—Provided a part time Eighth Grade Equivalency program for veterans.
- 5—Assisted local residents with citizenship problems.

The following statistical report will indicate the number of classes at each center and the number of students enrolled on December 1, 1948:

Evening Schools

School	Classes	Enrollment
New Bedford High School	17	502
John B. DeValles	6	92
Hosea M. Knowlton	5	66
Abraham Lincoln	5	84
Allen F. Wood	4	59
Total		<hr/> 803

Day Classes

John H. Clifford	2	29
John B. DeValles	5	83
Robert C. Ingraham	2	29
Sarah D. Ottiwell	2	37
Total		183

Other Centers

Bay Village Library	2	33
Fee Patri School	1	29
Athroath Achim Synagogue	1	11
Total		73

In September 1948, the New Bedford Evening High School was incorporated in the Adult Civic Education Department. The increased enrollment in the various courses offered indicates that the school is meeting the needs of adults who came to improve their knowledge and skills.

Veterans whose Regional High School classes were discontinued were offered personal assistance while continuing their studies in the Division of University Extension.

The General Civil Service Preparatory course coordinating with the Massachusetts Department of Education prepared students for civil service examinations.

The New Bedford Symphony Orchestra, organized during evening hours, will present a series of concerts during the winter.

Guidance Services were again made available to young employees and veterans during evening hours. General Educational Development tests were given students nightly as a preliminary to becoming candidates for the State Equivalency Certificate. Others took under supervision entrance exam-

inations for distant colleges. Some came to discuss their educational problems and get information on further training courses.

Although this service was designed for young employees and veterans, the Guidance Office has to its surprise and satisfaction been playing host to more and more parents. They have come together, in these afterwork hours, to talk over the choices of high school curricula that their children were shortly to be called upon to make or to learn the costs of higher education.

Adult Civic Education today means a great deal more than establishing and teaching classes of adult foreign born persons to learn English and meet all the qualifications necessary to pass the naturalization examination. Now our primary concern is to help citizens to accept their responsibility for democratic planning and living.

In our Day and Evening Classes we have introduced more discussion materials on current social, economic and political problems. Modern texts have been added to acquaint the new citizens with knowledge of our American heritage. The National Civic Federation has been most generous in supplying our classes with excellent visual-aid material. The Citizenship classes are also being included in the film schedule of our own Audio-Visual Education Department.

As Adult Civic Education workers in the community we have offered our help and guidance to those groups who are striving to promote good United States citizenship. It is fundamental that we and those who may work with us realize that the success of our program depends on whether it really performs a community service. Democracy cannot exist on theory alone. It must be put into practice in the performance of the duties of citizenship.

DEPARTMENT OF GUIDANCE AND PLACEMENT

An account of the philosophy underlying the work of this office and the development of its practices was presented in an article published under the title "Our Guidance and Placement Plan" on page fourteen of *The Massachusetts Teacher* in January 1948.

The director participated as a member of a panel of seven at three statewide conferences held at Belmont in January, at New Bedford in March, at West Springfield in April and as a consultant October second in Cambridge at a conference attended by two hundred college directors of admission and High School and independent school officers concerned with getting young people into college. The director has been on call for talks on Guidance before clubs, such as the Alcott Club February second and the Quota Club June eighth and the Buzzards Bay PTA April twelfth. During Education week in November she spoke briefly over WNBH.

We are happy to report that with the cooperation of Miss Sweeney the Cumulative Record cards have been started this fall in Kindergarten and Grades I, II, and III. A new inventory card also was put into action in the Senior High School. When Cumulative Record and High School Inventory (which fits neatly into the same container) meet as they will in six years, there will be available a complete story of each pupil's development and the means to help him make wise educational and vocational choices.

The Superintendent made it possible this year for all members of the academic classes of the eleventh grade, one hundred ninety-four in number, to take the Boston University battery of aptitude tests. In due time, the service should be extended to all Juniors and, even more important, exploratory tests should be given to pupils in the eighth grade to help them and their parents select wisely their High School program and make long range plans for the future.

Miss Carroll worked with Dr. Frances Triggs of the Educational Records Bureau on a nation-wide project, standardizing scores on diagnostic reading tests. The value of the results provided for our local use far outweighs the time and energy expended in participating in the experiment.

Difficulties in reading and studying, diagnosed by tests and interviews, did not have to go unremedied this year, for part of the time of Mrs. Kula Kontanis, on loan for a third of the day from the list of substitutes, was spent in helping worthy pupils who had a chance of passing if provided with help at the right moment. The report prepared by Mrs. Kontanis on this work which she did with great sympathy, understanding, and enthusiasm shows a saving of dollars, since 67% of the pupils in the clinic passed and did not have to be re-taught, and, more important, a strengthening of morale, since young people went forward with their classmates.

The books and pamphlets in the Occupational Library supervised by Miss Thomson have increased and have been in frequent use. School committees from other communities, college students majoring in Guidance, counselors wishing to inaugurate a system, visit the office to observe the filing of this material and of the inventory cards.

Realizing that for High School graduates the problem of getting into college was as critical as in '46 and '47, the Guidance Office prepared a sixty-four page booklet of suggestions which has been distributed to Juniors and Seniors. They and their parents will have a clearer idea of the procedures and the costs involved in going to college in this post war era.

No report of the Guidance Office would be complete without statistics. From September 1947 to September 1948, the interviews numbered 9,433. That represents over nine thousand problems presented, tackled, and in many instances solved.

Mr. Thomson's careful follow-up by card, phone and personal call will provide by January first a complete report of

the graduating class of 1948 as well as a two-year check of the class of 1946. These two studies will indicate how seven hundred ninety-nine young people, widely scattered in all parts of the world, are using the training they received in the High School.

The Guidance staff is grateful for the cooperation of teachers and administrators and especially grateful this year to those principals and teachers in the highly important early grades who are inaugurating the Cumulative Records.

BOYS' CONTINUATION SCHOOL

Mr. Charles J. Kulick was elected academic instructor to succeed Mr. Edward Wojnar at the North School.

During the year a report card was introduced with very satisfactory results. There has been a decided improvement in the attitude and effort of the pupils and cooperation on the part of parents has been very good.

Textbooks were received for the use of those pupils who intend to qualify for an eighth grade certificate. At the present time five boys are working toward this objective.

Educational material was received from the New York, New Haven and Hartford Railroad, General Motors, Brown and Sharpe, Morse Twist Drill and other industries. It has been adapted to the particular needs of instruction.

One new South Bend lathe, two used Atlas Bench lathes, some electronic equipment, small tools and brass rods were received from war surplus material. The bench lathes were fitted with legs. Some Army Field Telephone equipment, obtained from the same source, has been installed in all the classrooms of the South School by the boys of the electrical class and training in the operation of the system is now being given. Generally the equipment is now so old that modernization is desirable as soon as possible.

Statistics for the School Year ending June 1948:

Number of boys served	215
Number of hours of service	81,092
Number who left during the year	157
Number who obtained jobs	154
Placed by the school:	
Full time	58
Part time	54
Trained for the job:	
Full time	35
Part time	27

GIRLS' CONTINUATION SCHOOL

Statistical data for the year 1947-1948:

	Continuation School	General Vocational Department	Total
Number of girls served	107	62	169
Number of hours of service	6710	3107	9817
Number placed—full time jobs	36	74	110
Number placed—part time jobs	3	15	18
Number of hours—Follow-Up			610
Number of visits—Homes			308
Number of visits—Employment			272
Number of lunches served			5406
Number of garments made			208
Number of Red Cross Certificates (Junior)			93

The school committee on August 29, 1947 authorized the granting of grammar school certificates to pupils who successfully completed the eighth grade work during attendance in the general vocational department. The privilege is appreciated. It has presented an opportunity to meet a need which has long been recognized. Pupils who have completed the sixth grade requirements in the shop work classes may now look ahead to graduation under a similar educational philosophy. In June one girl graduated. It was a proud occasion for her, an inspiration for others. The number receiving certificates should increase from year to year. The number of pupils enrolled in the General Vocational Department in September 1948 is greater than it has been. The granting of certificates may have been a contributing factor.

More parents have visited the school this year than in the past. Parental cooperation has increased to a marked degree. This has been a gratifying reaction from our follow-up activity.

The guidance and placement work has been very satisfactory. The study of occupations continues to establish a healthy attitude towards work. An attempt has been made to meet every request for girls to fill jobs for which they qualify.

The high cost of food materials made it compulsory to find some way of meeting the advanced cost of the foods classes. For a number of years the problem was met by selling, at cost to the pupils at noon, the meal prepared in the morning classes. To carry out this policy this year would mean charging a price greater than the girls should be asked to pay. The Federal School Lunch Program has been introduced this year. It will serve a two-fold purpose. The girls will receive a good balanced meal at a reasonable price. The school maintenance cost will be lower than it would otherwise have been.

The work of modernizing the shop rooms is progressing under the three year replacement plan. A new automatic washing machine has presented an opportunity to teach the principles involved, the intelligent care and use of this modern device. Some pupils already have automatic washers in their homes, while others use them in the neighborhood laundry centers. The new sinks in the school kitchen are a help in establishing higher health standards at the same time aiding materially in carrying on the lunch program. New stoves are needed in the school kitchen. When installed the equipment for foods will be of a high standard.

Junior Red Cross certificates have been granted in both Home Nursing and First Aid. Miss J. Irene Eldredge R. N. is an approved Red Cross instructor.

The girls in the clothing classes have made a wide variety of new garments and have developed skill in redesigning and remodeling many others.

Two members of the teaching staff, in carrying out the professional improvement requirements of the state office, have received Masters' Degrees.

DEPARTMENT OF AUDIO-VISUAL EDUCATION

During the school year ending June 1948 the audio-visual education program as outlined in the Annual Report for 1947 was continued and expanded. Educational films were exhibited to pupils on all levels in all our schools by a projectionist under a contract awarded by the School Committee. The use in our classrooms of a greater number of improved filmstrips and slidefilms was increased with corresponding benefit to the specific needs of the pupils. To facilitate the program the following equipment was purchased during the calendar year 1948:

- 5 Da-Lite Beaded Screens
- 1 Da-Lite Matte Fabric Screen
- 1 RCA 16 mm. Sound Film Projector with
Short and Long Lenses
- 4 Viewlex 35mm. Filmstrip and Slidefilm
Projectors

The gradual growth of audio-visual education in our school system during the preceding five years reached a point where it became imperative to create a separate division with a full-time director to administer and develop this modern and important phase of educational activity. Accordingly, on April 28, 1948, the School Committee elected Miss Margaret M. Jackson to act as Director of Audio-Visual Education effective September 1948.

It has been the aim of this department to assist teachers by clarifying subject matter and by making the learning process more enjoyable. Since September 6th, every pupil in our schools and hospital classes at Sol-E-Mar has made use of many audio-visual aids in correlation with his classroom activities.

Because we own two 16mm. sound films only, one hundred and forty-two reels have been rented to be used for the current year in all schools. These films cover every subject

in our school curriculum. Our collection of 35mm. film strips has reached one hundred and sixty rolls. These film strips, with portable screens and light weight projectors, are borrowed from the department library for weekly periods.

Each film shown has been previewed either by a group of teachers and principals or by Miss Jackson. Courses of study and holiday interests were considered when subjects were chosen. An educational introduction prepared by the department is presented to every class before the showing of the film. Re-showings and follow-up work are left to the discretion of classroom teachers. Evidences of the correlation of the films with Art and English lessons have been proudly presented to the Director by pupils of many classes.

As the educational element replaces that of entertainment, we are moving our locale for film projection from the auditoriums to the classrooms. In this way, only the class working on the subject depicted in the film studies it. Projection classrooms, equipped with dark shades and portable screens, are now in use in twelve elementary and secondary schools. Our greatest need for a room of this type is in the senior high school. Projection clubs have been started in eight schools to train students in the skillful operation of projectors and in the care of projectors and films.

Flat mounted pictures, owned by the department, are having improved circulation. The New Bedford Public Library is cooperating by loaning additional pictures to be used in discussion of film content and in the preparation of classes for radio lessons. At the present time, few schools are taking advantage of the educational radio programs that are being broadcast from a Boston station. As programs of this type increase and improve, I am sure we shall have more "listening classes".

A study is being made to increase the use of charts, models, puppets, museums and sound tables in our schools.

Very little work in audio education has been developed and there is no equipment of any type for this work in the department. However, as soon after the new year as equipment (disc, wire or tape recorders) can be procured, this important educational medium will be adapted to our class work in music, speech, social studies, languages, etc.

The enthusiasm with which the department has been received by teachers and students makes almost certain the increased number of, and varieties in, the demands for its services. The following plans for new activities are now in the formative state:

- 1—As large numbers of requests for basic and documentary films come from classroom teachers, these will be purchased.
- 2—Arrangements have been made with a local radio station so that we may have weekly periods of broadcasting by students for in-school listening.
- 3—Arrangements have also been made for class field trips to local points of interest.
- 4—The Old Dartmouth Historical Society will put aside one day weekly for class visits. The information on traveling loans will be sent to the schools so that teachers may plan accordingly.
- 5—Arrangements have been made with the Massachusetts Department of Audio Education whereby we shall receive weekly loans of educational records for use in all schools.

WILLIAM E. SARGENT ATHLETIC FIELD

During this year we have added one new piece of equipment, a gang mower, and a new dugout for baseball, the latter built by the New Bedford Vocational High School. One other improvement was the changing of the underpass under the grandstand providing more head room.

The big problem at Sargent Field is how can we keep the playing surface in good condition when there is such a great demand for its use. There are four high schools and one college in the city and two semi-pro football teams who want it for their home games. Thirty football games were played on it this year and, as a result, before the season was half over, most of the grass was gone.

There are two ways by which the above problem might be partially solved. First, we could close the field to all but school sports, and, second, take over more city-owned property north of the field. The baseball diamond could be built on the new addition and charity activities could be held there. Also, one new set of portable stands might be needed.

Many new improvements are needed but two are of the most importance. We need three new floodlights in the grandstand which would cost about \$350. The other is the hard surfacing of the ground around the club house and under the grandstand.

In closing I wish to thank the members of the School Committee for their cooperation and consideration and my associates in the department for their fine work and loyal support.

Respectfully submitted,

W. KENNETH BURKE

ANNUAL REPORT
of the
COMMISSIONER
of
PUBLIC WORKS
of the
CITY OF NEW BEDFORD, MASS.
to the
CITY COUNCIL
1948

BRADBURY-WARING, INC.
New Bedford, Mass.
1949

COMMISSIONER'S REPORT

February 4, 1949

To the Honorable Mayor and City Council
New Bedford, Massachusetts

Gentlemen:

I submit herewith my annual report of the operations of the Department of Public Works for the year ending December 31, 1948.

Appropriations and expenditures for the entire year are shown in the various tables, together with a chart giving the comparative Highway expenditures covering the period from 1924 to 1948 inclusive.

STREET CONSTRUCTION. Bituminous macadam, bituminous gravel and Type I streets were resurfaced to the extent of 220,528.80 square yards. The program of laying a top of Type I material over the existing surface of certain streets was continued. More of the so-called "car track streets" were thus treated. Practically all of this work in 1948 was financed by using the balance of the Macadam Loan Bond Issue which amounted to \$179,492.66.

SEWER CONSTRUCTION. The 54 inch Crapo St. outfall was laid. New sewers were also laid in the following streets: Jarry, John, Metcalf and Monmouth.

CHAPTER 90. Under section 34, Chapter 90 of the General Laws, the second and third sections of reconstruction of Mt. Pleasant Street were completed by Contractor Thomas Brothers, Middleboro, Massachusetts.

I take the opportunity at this time to express my appreciation for the cooperation that I have received from His

Honor the Mayor, members of the City Council, the various Department Heads, and my own faithful assistants in carrying on the work of this Department.

Respectfully submitted,

PATRICK J. FOLEY,

PJF:G

Commissioner

GENERAL STATISTICS

January 1, 1949

Set off from Dartmouth	1787
Incorporated as a city	1847
Length of city	10.78 miles
Breadth of city (Maximum)	3.10 miles

SUMMARY OF WORK

- 9424 Trees, (approx.) now shading city streets
730 Requests made at the office
597 Trees trimmed and treated in answer to requests
30 Inspections made requiring no labor by the
department
9 Hornets' nests removed

Trees Removed

- 76 Dead or dangerous trees removed
4 Trees broken by autos
4 Trees felled by wind
8 Trees removed for driveways

92 Total trees removed

Trees Planted

- 107 Norway maple trees
4 Elm trees

111 Total trees planted on various streets

WATER BOARD REPORT

December 31, 1948

*To the Mayor and City Council
of the City of New Bedford.*

Gentlemen :

In accordance with the provisions of Chapter 25, Section 12, of the City Code, the New Bedford Water Board herewith respectfully presents its seventy-ninth annual report, recording its operations for the calendar year 1948, including the reports of the superintendent and water registrar.

Mr. Alonzo V. Jason was renominated by the mayor and confirmed by the City Council as a member of this board for a further term of four years from the first day of June, 1948, this being Mr. Jason's second term in this office.

The demand for extension of main pipe and installation of new water services was about the same as last year. There have been extensions of main pipe in twenty-eight locations with a total length of 5278 feet; and two hundred and eleven new services have been installed.

The use of water reached a new high in 1948. It exceeded that for 1947 by 4.8% and that for 1940 by 65%, having increased steadily for the past four years.

The daily use exceeded 20,000,000 gallons on 26 days, and exceeded 18,000,000 gallons on 83 days.

The increase in the use of water in our city during the past decade is far ahead of the gain in any other decade of the past fifty years, as shown by the following comparison :

Year	Average Daily Consumption Gallons	Percent Increase
1898	5,907,610	
1908	7,488,160	27
1918	9,759,405	31
1928	8,214,332	16 <i>decrease</i>
1938	8,915,839	8
1948	15,736,576	76

This phenomenal increase has imposed a load upon our pumping facilities which is just about all they can carry. It required the simultaneous operation of all our pumps on 74 days this year, leaving no margin of safety whatever.

We now have a total installed capacity of 20,000,000 gallons per day with steam pumps and 5,000,000 gallons per day with the electric pump. There were days this year when water was being used faster than we could pump with all pumps. Only storage in High Hill Reservoir carried us over these peaks.

Bids will be opened on January 19, 1949 on new pumping equipment with the following installed capacity:

Electric pumps	36,000,000 gallons per day
Diesel pump	30,000,000 gallons per day

Either type will deliver more than our present total pumping capacity, and the two types operating together will pump about two and one-half times as much.

It will not be known until the bids have been opened whether there is any possibility of securing one of the new pumping units so that it can be installed for emergency service during this coming summer. It is hoped that we may be able to set up the diesel unit or one of the electrical units outside the present pumping station building in a temporary installation in time to help us meet heavy demands this summer. The temporary outside installation is necessary

in any event to carry the pumping load while present equipment is being removed from the building and new equipment installed in its place.

As stated last year in our report, "Until additional pumps are in operation, a failure in the old boilers, steam engines or pumps could cause serious disruption of our industrial life." This equipment is now entering its fiftieth year of operation. The boilers, particularly, can not be expected to last much longer. They have already outlived any similar installation of which we have knowledge.

We are doing all we can to secure the best pumping equipment in the least time needed for such an important matter.

We have the fullest confidence in the ability and foresight of our staff to do everything possible to keep the old equipment going; and in the firm of Fay, Spofford and Thorndike, engineering consultants engaged to advise us in the selection and installation of the new equipment.

The fact remains, however, that we will feel extremely happy and fortunate if we are able to report next year that we have met all demands for water during 1949 and that the uncertainty of our future ability to do so for many more years has been overcome.

We are happy to report that the new elevated water storage tank on Hathaway Road is now in operation, and is working very satisfactorily. There are now satisfactory pressures and an assurance of adequate water to fight any fire in this area. We are pleased to commend the willingness and competence of our superintendent to prepare the specifications and supervise the construction of this \$50,000 improvement. His work saved the department several thousand dollars in engineering fees.

The new Moto-Crane has proven itself a very valuable addition to our construction equipment. Installation of

main pipe and services has proceeded much more quickly, cheaply and easily through its use. It has also done a very considerable amount of work for other city departments and thereby reduced their costs.

The following abstract from the Water Registrar's report shows in condensed form the financial operations of this department during the year. Full details will be found in his report, which accompanies this.

FIRST, BASED ON THE BUDGET SYSTEM IN ACCORDANCE WITH
CITY AUDITOR'S ACCOUNT

1948 Budget Appropriation	Salaries & Wages	Labor	General Expense	New Equipment	Totals
Budget Appropriation	\$105,075.40	\$119,436.80	\$155,375.00	\$468.00	\$380,355.20
Tax Refunds			88.93		88.93
Cost of Living Adj. \$200.00 per yr. per employee	8,253.53	11,035.44			19,288.97
Totals	113,328.93	130,472.24	155,463.93	468.00	399,733.10
Expended 1948	112,764.94	129,762.31	154,809.71	456.48	397,793.44
Balances	563.99	709.93	654.22	11.52	1,939.66
1948 Encumbrance			* 184.92		* 184.92
					Un-expended Balance 12/31/48 1,754.74

* This amount set aside in City Auditor's Account for Mdse. ordered
in 1948. Delivery to be made in 1949.

SECOND, BASED ON RECEIPTS AND EXPENDITURES

Receipts

For water, meter rentals, demands and charges	\$477,128.66
Miscellaneous Receipts	32,530.81
From Bond Issues of 1947	89,032.75
	<hr/> 598,692.22

Expenditures

Expended from Bond Issues for Management and Repair	\$35,845.83
Management and Repair, from Appropriation, including Cost of Living Adjustment	327,751.03
Interest	21,741.25
Bonds	108,000.00
Extensions paid from Bond Issues	53,186.92
Extensions paid from Appropriation	70,042.41
	<hr/> 616,567.44

Deficit year ending Dec. 31, 1948 17,875.22

The Total Outlay for the Construction of these works exclusive
of debt, interest, management and repair through 1947 was 7,046,192.44

INCREASE

	Payments	Credit	Net	
Distribution	\$123,229.33	\$23,400.41	\$99,828.92	99,828.92
				<hr/>
				Net cost of works Dec. 31, 1948 \$7,146,021.36

The following is a statement of receipts and expenditures for the past eleven years
RECEIPTS AND EXPENDITURES SINCE 1937

Year	Water Receipts for	Total Receipts	Maintenance Interest and Bonds	Extensions Paid from Regular Receipts	Extensions Paid from Bond Account	Returned to General City Funds	Total Expenditures	Balance 1st of Year
1938	336,372.21	352,635.09	322,840.37	16,739.84		13,054.88	339,580.21	
1939	355,327.24	370,079.18	299,351.11	18,905.73		51,821.34	318,257.84	
1940	358,332.76	369,585.15	294,275.52	9,498.36		65,811.27	303,773.88

1945	425,009.92	456,385.88	317,184.27	12,079.42		127,122.19	329,263.69	
1946	442,085.93	486,955.10	356,544.67	40,253.12		90,157.31	396,797.79	
1947	468,138.07	*229,861.65	*403,755.53	50,292.68	*15,668.41	60,145.03	*469,716.62	
1948	477,128.66	598,692.22	493,338.11	70,042.41	53,186.92	— 17,875.22	616,567.44	
Totals	4,453,588.09	4,812,142.46	3,661,058.58	264,481.74	80,059.49	817,746.81	4,005,599.81	

* Includes receipts and expenditures from 1947 Bond issues

Revenue from the operations of the water department for the year 1948 amounted to \$509,659.47, and shows an increase over revenue from 1947 in the amount of \$6,170.08. Receipts from the sale of water exceeded those for 1947 in the amount of \$10,990.59, due to an increased use of water of about 290,000,000 gallons.

Pay rolls increased in the amount of \$25,758.27 above those for 1947, or about twelve percent (12%).

Expenditures from budget appropriations for General Expense in 1948 increased in the amount of \$31,751.15 above those for 1947, or about twenty-six percent (26%).

Total budget appropriations in 1948 amounted to \$380,355.20 and exceeded those for 1947 by \$42,474.52, or about thirteen percent (13%).

Extensions (permanent plant improvements) paid for from budget appropriations amounted to \$70,042.41, and exceeded similar investments in 1947 in the amount of \$19,749.73, or about thirty-nine percent (39%).

Prices of materials and supplies used by the department continued to advance during 1948. The average cost of coal for 1948 was \$14.09 per net ton as compared with \$12.01 for 1947, an increase of 17%.

These increased costs, coupled with an increase of \$40,000 in bond repayments, and much larger expenditures for permanent improvements resulted in a net deficit of \$17,852.22 for the ordinary operations of the department for 1948.

The following list of the principal contracts made by the Board during the year is an indication of the large scope of its operation:

DATE	CONTRACTOR	SUPPLY	Consideration
1948			
January 2	John J. Gobell Company	Liquid Chlorine	\$. .095 per lb.
January 26	Darling Valve & Mfg. Company	12" Gate Valve	\$131.90 net
January 26	A. P. Smith Company	1-48" x 12" Hackensack Tapping Sleeve	\$474.60 ½% 10 days

New Bedford Water Board.

REPORT OF THE WATER REGISTRAR

CITY OF NEW BEDFORD,
WATER REGISTRAR'S OFFICE,
December 31, 1948.

To the New Bedford Water Board:

Gentlemen:

I herewith present to you a detailed statement of the receipts and expenditures of the Water Works Department for the year ending December 31, 1948.

The report is based on Budget vs. Expenditures and also on Receipts and Expenditures as previously.

First, Based on the Budget System

RECEIPTS

Budget Appropriation	\$380,355.20
Gas Tax Refunds	88.93
1948 Cost of Living Adjustment	19,288.97
	<hr/>
	\$399,733.10

EXPENDITURES

Bills	\$155,266.19
Payrolls	242,527.25
	<hr/>
	397,793.44
	<hr/>
	1,939.66
1948 Encumbrance Account	184.92
	<hr/>
Un-expended balance December 31, 1948	\$1,754.74

Second, Based on Receipts & Expenditures as previously

RECEIPTS

Rates	
Under 10,000 cu. ft. per quarter	\$197,837.30
Over 10,000 & less than 100,000 per quarter	48,074.84
Over 100,000 & less than 1,000,000 per quarter	76,745.53
Over 1,000,000 & less than 2,000,000 per quarter	45,684.60
Over 2,000,000 cu. ft. per quarter	75,390.20
Estimated and building purposes	3,503.25
	<hr/>
Total receipts for water	447,235.72

Meter rentals	28,853.63
Demands and charges	1,039.31
Total receipts, water, meter rentals, demands and charges	477,128.66
Miscellaneous receipts, for detail see credits under expenses	32,530.81
	509,659.47
Receipts from 1947 Bond Issues	89,032.75
Total receipts from all sources	598,692.22

EXPENDITURES

Bills from Appropriation	155,266.19	
Bills from Bond Issues of 1947	89,032.75	
Payrolls	242,527.25	
Interest	21,741.25	
Bonds	108,000.00	616,567.44
Deficit year ending Dec. 31, 1948		17,875.22

EXPENDITURES IN DETAIL

REPORT OF THE SUPERINTENDENT

NEW BEDFORD WATER WORKS,
SUPERINTENDENT'S OFFICE,
February 25, 1949.

To the New Bedford Water Board:

Gentlemen:

The annual report of the superintendent on general conditions of the works and operations for the year, and his recommendations for the future, are respectfully submitted.

The report of the water registrar, the rainfall records, chemical analyses, and the usual tables showing in detail the work of the department for the year, are incorporated.

FINANCIAL

The financial operations of the department are covered in the report of the water registrar in full, and summarized in the report of the Water Board.

A deficit in the amount of approximately \$18,000.00 bears out the prediction of the superintendent last year that it was doubtful whether there would be any surplus for the year 1948. As you were informed in my report to you dated October 29, 1948, it now seems inevitable that this department must show a sizable deficit for the year 1949.

The ordinary expenditures for management, operation, and repairs of the department may be expected to approximate \$350,000, and bond and interest charges, an additional \$125,000. The total of these fixed and operating expenditures should be well below anticipated receipts of at least \$500,000. It is the cost of extensions of our distributing system which is responsible for deficits. There is no way of forecasting accurately what the cost of such extensions

may be in 1949. However, the extension of water services to three sites proposed for the construction of several hundred units of public housing, the possible installation of water mains around Sassaquin Pond, and the usual petitions for water pipe extensions to new private homes in various locations, could very well require the expenditure of more than \$100,000.

Under our system of assessment charges, the costs of such extensions should be amortized over a period of twenty years or so. It is a matter of record that the surplus earned by this department since 1934 would be sufficient to absorb such deficits and also to extinguish all outstanding water debt. This surplus has been expended for purposes other than water supply, however, and is not now available for our use.

CONSUMPTION

The use of water continued to increase in 1948. The amount used during August, 1948 averaged nearly 18,500,000 gallons per day, and exceeded the use in August, 1947 by about ten per cent.

Every effort is being made to secure and install outside the Quittacas Pumping Station one of the new pumping units recommended by Fay, Spofford & Thorndike in sufficient time so that it may be in operation by the first of August, 1949. Unless this unit is available at that time, there is good reason to fear that we will not be able to meet the demand for water during the coming August. We were barely able to keep up with the demand during 1948.

RAINFALL

The rainfall at Little Quittacas Station for the year was 52.64 inches. This is 12.96 inches more than last year and 7.26 inches more than the average for the past fifty-four years at this station.

POND ELEVATIONS

The water level in Great Quittacas Pond has ranged between 51.62 and 48.76. The average elevation for the year was 50.44. The present elevation is 50.42.

The water level in Pocksha Pond has ranged from 51.58 to 48.83. The average elevation for the year was 50.27. The present elevation is 49.85.

The water level in Little Quittacas Pond, which is controlled by a gate in the connection to Great Quittacas Pond, has been kept somewhat lower than that of Great Quittacas Pond, in accordance with the practice of many years, thereby improving the taste, color, and odor through better drainage of the swamp located north of Little Quittacas Pond. The average elevation for the year was 47.92. The present elevation is 47.97.

All elevations given are in feet above mean high water in New Bedford harbor.

FORESTRY

Gross expenditures for forestry operations for the year 1948 amounted to nearly \$10,000, approximately the same as for the preceding year.

The fire lanes were maintained in good condition, and the exposed shores of Little Quittacas Pond were harrowed and drained.

The department contributed substantially in time and greens to the Christmas embellishment of the Public Library.

The cranberry crop was a complete failure and no bid was received for the berries in 1948.

A fire patrol was maintained as usual during hazardous dry periods.

COAL IN STORAGE

The inventory of coal in the storage shed on December 31, 1948 was 261 tons, about 211 tons less than on December 31, 1947. Arrangements are being made to increase this storage to approximately 1000 tons within the next month.

WATER TREATMENT

All water pumped during the year was sterilized through the addition of liquid chlorine at the rate of about six pounds of chlorine to one million gallons (83,000,000 pounds) of water. No complaints of taste or odor ascribable to this treatment have been received.

Fay, Spofford & Thorndike, as a part of their report to the Water Board, expressed the belief that the benefits to be derived from further treatment or filtering our water would not be sufficient to justify the expenditures required for such treatment.

WATER ANALYSIS

No provision was made in the 1948 budget to the New Bedford Board of Health to provide for regular bacteriological analyses of samples of water from the ponds and from the distribution system. Regular analyses in sufficient numbers to assure the delivery of water of excellent bacteriological quality should be a routine procedure. The Massachusetts Commissioner of Public Health has several times urged upon this department the desirability of making such analyses. It is recommended that arrangements be made to make such routine tests as soon as possible.

FORCE MAIN

Both force mains were used during the year without requiring maintenance or repairs worthy of mention.

DISTRIBUTION SYSTEM

Approximately 10,000 feet of the oldest four and six inch cast iron pipe in the city was cleaned in place under contract with the Flexible Underground Pipe Cleaning Company at a cost of approximately 18 cents per foot. Through this operation, the original carrying capacity of the clogged pipe was substantially restored.

A valve was inserted in Brock Avenue near Emery Street and about 200 feet of six inch main pipe in Freeman Street to permit the continued supply of water to Willard, Dudley, Valentine, and Woodlawn Streets in the event of a break in the main pipe in Brock Avenue.

Thirty-four hydrants have been damaged as a result of traffic accidents. The total cost of repairs was \$2,279.06 of which \$1,381.87 has been collected.

LEAKS

There have been twelve leaks on main pipe during the year, as herewith shown:

Date	Size	Location	Cause	Cost
Jan. 1	6"	Hawthorn Terrace, 150' N. x N. line Hawthorn Street	Main leak	\$127.46
Feb. 3	6"	S. W. Cor. So. Front & Howland Sts.	Joint leaking	72.10
Apr. 23	2"	Smith St. Court	Broken pipe	35.54
May 10	36"	60' Right-of-way, 100' W. x Shawmut Ave.	Main leak	189.96
June 18	36"	Acushnet Crossing, 4' E. x E. Rail (Acushnet Station)	Joint leaking	35.22
June 24	6"	Summer St., S. W. Cor. Adams St.	Joint leaking	19.34
Aug. 23	6"	S. S. Frederick St., W. x Rodney French Blvd. E. 415'	Joint leaking	18.93
Nov. 10	6"	Woodlawn St., opposite Freeman St.	Joint leaking	46.79
Nov. 24	8"	Adelaide St., at intersection of Monmouth St.	Main leak	51.13
Nov. 28	4"	In front of 50 Sherman St.	Main leak	97.99
Dec. 12	6"	Frederick St., 25' W. x W. line Cleveland St.	Main leak	106.40
Dec. 29	8"	Chaffee St., 34' E. x W. line Church St.	Main leak	111.67

720 feet of distribution pipe (less than 4") have been laid, and 459 feet removed. The total length now in use is 11,315 feet.

Seventeen new stop gates have been set and none of those previously set has been removed. The total number now in use is 3,008.

Two small size gates have been set and two of those previously set have been removed. The total number now in use is 94.

Total number of waste gates now in use is 206.

Total number of air taps now in use is 215.

Twenty-six private gates have been set and none of those previously set has been removed. The total number now in use is 848.

Thirteen new hydrants have been set and seven of those previously set have been removed. The total now in use is 1,944.

The total number of water cart hydrants now in use is 27.

The total number of sprinkler cart hydrants now in use is 8.

Two hundred ten service pipes have been laid and ten of those previously laid have been removed. The total number now in place is 20,301. Of this number, three hundred five are unmetered fire services, seventeen thousand eight hundred ninety-one are metered, and the balance, two thousand one hundred five are not in use.

Seven hundred ninety-five taps have been cleaned as follows:

Rust 672; trouble inside 123.

Two hundred thirty-one leaks in services have been repaired in addition to main pipe leaks.

One thousand seven hundred ninety-one meters have been removed for repairs, and one thousand seven hundred twenty-seven have been reset. * Also two hundred eighteen new meters have been set for the year, making the total number now in use 17,891.

CONSUMPTION OF WATER

The consumption of water for the year has been as follows :

Month	Monthly Consumption				Daily Average Consumption
	New Bedford	Dartmouth	Acushnet	Total	
	Gallons	Gallons	Gallons	Gallons	Gallons
1948					
January	433,735,274	11,479,500	7,695,000	452,909,774	14,609,993
February	409,030,194	5,448,000	5,009,250	419,487,444	14,465,084
March	444,994,074	7,497,000	7,494,000	459,985,074	14,838,228
April	426,434,308	7,341,000	7,815,000	441,590,308	14,719,677
May	426,145,294	7,372,500	6,150,000	439,667,794	14,182,832
June	466,728,472	8,256,000	6,642,000	481,626,472	16,054,216
July	485,085,138	8,610,000	5,133,750	498,828,888	16,091,254
August	554,893,392	11,351,250	7,239,000	573,483,642	18,499,472
September	509,523,800	15,357,750	17,047,500	541,929,050	18,064,302
October	485,636,326	8,879,250	13,699,500	508,215,076	16,394,035
November	460,637,648	8,472,000	7,725,750	476,835,398	15,896,513
December	454,186,712	3,397,500	7,443,750	465,027,962	15,000,902
Totals	5,557,030,632	103,461,750	99,094,500	5,759,586,882	
Averages	15,183,144	282,682	270,750		15,736,576

Maximum daily consumption—(24 hrs.) Aug. 16 22,405,624

Minimum daily consumption—(24 hrs.) May 30 8,604,854

Average daily consumption—6 A.M. to 6 P.M. 9,383,960

Average night consumption—6 P.M. to 6 A.M. 6,352,616

Amount of water consumed shown on above table includes the supplying of about 65.42 miles of distribution pipes located in the adjoining towns of Dartmouth and Acushnet. Dartmouth supplies 8340 consumers, of which 295 are summer residents, through 2085 taps. Acushnet supplies 3506 consumers through 746 taps.

COMPARISON OF THE CONSUMPTION OF THE YEAR 1948 WITH THE
RECORD OF THE 67 PREVIOUS YEARS

Year	Estimated Population	Estimated number of consumers	Number of taps	Total number of gallons consumed	Average daily consumption	Gallons per day to each inhabitant	Gallons per day to each consumer	Gallons per day to each tap	Number of meters

*Includes population supplied in towns of Dartmouth and Acushnet 2,831 taps, 11,846 consumers.

‡This consumption is for eleven months.

†This consumption is for thirteen months.

CONSUMPTION

The average daily consumption, 15,736,576 gallons, shows an increase of 5.1% over 1947.

The excellent quality of our water for chemical processes and the extremely low average rate for takers using in excess of five million gallons per month have been important factors in the decision of several large industries to develop plants in our city.

The following table shows the number of accounts, registration, and income in the several steps of the sliding scale of rates:

DATA ON METERED CONSUMPTION AND REVENUE

JULY 1, 1947 THROUGH JUNE 30, 1948

(All active services except fire supplies are metered)

	No. of Accts.	Number of Gallons			Receipts for Metered Water

RECOMMENDATIONS

It is considered urgently desirable that the gate and hydrant books be reprinted as soon as possible. This request has been repeated for several years past, but our appropriation has been insufficient to permit of such reprinting.

It is likewise considered urgently desirable to duplicate the set of 150 plat plans which are our only detailed record of the distribution system worth several million dollars. If these plans are lost through fire or otherwise, it will cost not less than \$30,000 to secure inferior information.

It is recommended that the stand pipe on Acushnet Avenue be painted with two coats of aluminum on the outside, and the inside patched and painted with some bituminous material, the estimated cost of which is \$2,000.

The superintendent repeats his recommendation that there be one more water construction foreman appointed.

Plans are progressing for the improvement of the electric wiring and lighting at the repair shop. It is hoped that this work can be undertaken in 1949. Estimated cost is \$4,000.

The purchase of copper tubing in an amount exceeding 10,000 feet or pounds saved at least \$1,000 during 1948. Practically all of this copper has been used, and it is recommended that another similar purchase be made in 1949. Estimated cost is approximately \$5,000.

The thorough cleaning of the bottom of High Hill Reservoir continues to be postponed, for the reason that it is unsafe to take this reservoir out of service with present high demands for water and the limited pumping capacity. This work should be undertaken after new pumps have been placed in operation.

The roof of the gate house at Mt. Pleasant Reservoir is in very poor condition. It is recommended that this be repaired during 1949.

We now have no shelter for the Lorain Moto-Crane and the accessory equipment. This machine and the additional booms and equipment have to be stored in the open at the repair shop at Water Street. It is recommended that a new building or an addition to existing buildings be constructed to provide protection for this equipment.

The addition of a winch to the TD-9 Tractor at a cost of about \$1,000 would make this equipment much more useful in various operations.

The superintendent wishes to express to the Mayor, the Water Board, and the members of the City Government, appreciation of their assistance during the year; and to repeat his gratitude to the employees of the water department for their excellent cooperation in serving the public.

Respectfully submitted,

HOWARD C. MANDELL,

Superintendent

The duty is based on total fuel used for all purposes. This includes banking fires, starting, heating building, running electric light engine at night. No deduction for ashes, moisture in coal or anything else.

TABLE I

STATEMENT OF WORK DONE BY LEAVITT ENGINE B FOR THE YEAR ENDING DECEMBER 31, 1948

Diameter steam cylinders 16% and 38 $\frac{1}{4}$ in.
 Diameter pump plungers 13 7-10 and 19% in.
 Stroke of Piston Plungers 90 inches.

Average working steam pressure 168 lbs.
 Average static head 167.92 ft.

Months	Number of days or parts		Total pumping time		Total number of strokes per month	Average number of strokes per minute	Fuel		Total number of gallons pumped per month, allowance being made for slip.	Number of gallons pumped per pound of coal for total coal.	Number of gallons raised 100 ft. per lb. of coal for total coal.	Average dynamic head against pump in ft: no allowance for friction in suction	Average duty in pounds raised one ft. high per 100 lbs. coal, calculated on total fuel used for all purposes
	H.	M.	lbs. Keeping spare engine warm.	lbs. All other coal including lighting and heating building.

SUMMARY OF STATISTICS.

FOR THE YEAR ENDING DECEMBER 31, 1948

IN FORM RECOMMENDED BY THE NEW ENGLAND
WATER WORKS ASSOCIATION.

NEW BEDFORD WATER WORKS.

NEW BEDFORD,
BRISTOL COUNTY, MASS.

GENERAL STATISTICS.

Population by census of 1948—109,353.

Date of construction, 1866 to 1869, inclusive. Further supply,
1895 to 1899, inclusive.

By whom owned, City of New Bedford.

Source of supply.—Water was first introduced on Nov. 26, 1869.

From that date until July 10, 1899, the supply was taken from a storing reservoir artificially formed by constructing a dam across the valley of the Acushnet River, seven miles north of the centre of the City. This supply was augmented by a connection made in 1886 with Little Quittacas Pond.

Since July 10, 1899, the whole supply has been taken from Great and Little Quittacas Ponds, eleven miles north of the centre of the city.

In 1926, under Legislative Authority to take $11\frac{1}{2}$ million gallons of water per day from Long, Assawompsett and Pocksha Ponds, a connection was made to bring water from Pocksha into Great Quittacas Pond, when needed.

Mode of supply.—Previous to July 10, 1899, the water flowed by gravity from the Acushnet Storing Reservoir (grade 40' + high water New Bedford Harbor) through a brick conduit 3 feet wide, 4 feet high, 5 6-10 miles long to a receiving reservoir (capacity 3 million gallons; grade 30') located opposite the Purchase Street Pumping Station. Thence it was pumped into the Mt. Pleasant Distributing Reservoir (capacity 15 million gallons; grade 154') located 1,879 feet distant, from whence it flowed by gravity into the city's distributing system.

Since July 10, 1899, the entire supply has been pumped from Little Quittacas Pond (grade 52'). It is pumped through two 48 inch force mains $8\frac{3}{4}$ miles long to a distributing reservoir (capacity 67 million gallons; grade 216') located upon High Hill, in the town of Dartmouth. From this reservoir it flows into the city's distributing system by gravitation through two 36-inch cast iron pipes averaging 4 1-17 miles in length.

It is also possible to pump directly to the city through a 48" and 36" main using the reservoir as a balance. This latter connection was completed in 1922.

The first named system is not now in use.

PUMPING STATISTICS

1. Builders of Pumping Machinery.

LITTLE QUITTACAS STATION

- a. b. Leavitt engines in duplicate, Capacity of the two engines built by Dickson Mfg. Co. 20,000,00 gallons per 24 hrs.
- c. DeLaval electrically operated centrifugal pump, directly connected with a General Electric squirrel cage type I. Form K. 3 phase, 60 cycle, 550 volt, 250 H. P., induction A. C. motor operating at about 1800 revolutions per minute, built by DeLaval Steam Turbine Co. Current purchased of New Bedford Gas and Edison Light Co. Capacity about 6,000,000 gals., delivered into High Hill Reservoir in 24 hours.

LITTLE QUITTACAS STATION—Engines A and B.

- 2. Description of fuel used.
 - a. Kind—bituminous.
 - b. Brand of coal—Pocahontas.
 - c. Price of coal per net ton—delivered Little Quittacas Station \$14.09.
 - d. Percentage of ash—12%.
 - e. Wood. price per cord—none used.
- 3. Coal consumed for the year—5,689,440 lbs.
- 4. (Pounds of wood consumed) ÷ 3—equivalent amount of coal—none used.
- 5. Total equivalent coal consumed for the year=(3)+(4) 5,689,440 lbs.
- 6. Total pumpage for the year—3,980,689,782 gallons with 4.8% allowance for slip.
- 7. Average static head against which pumps work—167.93 feet.
- 8. Average dynamic head against which pumps work—173.34 feet.
- 9a. Number of gallons pumped per pound of equivalent coal (5) 700.
- 9b. Number of gallons raised 100 feet per pound of equivalent coal (5) 1.213.
- 10. Duty = $\frac{\text{gals. pumped (6)} \times 8.34 \text{ (lb. x 100 x dynamic head (8)}}{\text{Total fuel consumed (5)}} = 101,000,000$
- 10b. Cost per million gallons raised into High Hill Reservoir (engines A. and B.)=\$25.81.

LITTLE QUITTACAS STATION—Engine C.

11. Total pumping time for the year 7,072 hrs. 2 min.
12. Total current used for the year 1,616,000 K.W.H.
13. Total pumpage for the year 1,772,585,000 gallons.
14. Number of gallons pumped per K.W.H. 1,097.
15. Number of K.W.H. required to raise one million gallons into High Hill Reservoir 912.
Cost per K.W.H. varies in accordance with amount consumed.
16. Average cost per K.W.H. \$.0145.
17. Cost per million gallons raised into High Hill Reservoir, (Engine C only) \$13.31.

Total cost of pumping, figured on pumping station expenses, viz: \$126,348.19.

18. Per million gallons pumped \$21.96.
19. Per million gallons raised one foot (dynamic)—12 cents.

Cost of pumping figured on total maintenance and interest on bonds, (see financial CC+DD) less credits, viz: \$276,207.71.

20. Per million gallons pumped \$65.39.
21. Per million gallons raised one foot (dynamic)—37 cents.

Cost of pumping figured on total maintenance, interest on bonds and bond payments (see financial CC+DD+EE) less credits, viz: \$484,207.71.

22. Per million gallons pumped \$84.17.
23. Per million gallons raised one foot (dynamic)—48 cents.

STATISTICS OF CONSUMPTION OF WATER

1. Estimated total population at date (New Bedford)....109,353
Acushnet 4,312, Dartmouth 11,000.....*124,665
2. Estimated population on lines of pipe*122,000
3. Estimated population supplied*122,000

Year July 1, 1947 through June 30, 1948

4. Total consumption for the year5,600,725,226
5. Passed through meters5,245,697,047
6. Percentage of consumption metered93½%
7. Average daily consumption15,302,528
8. Gallons per day to each inhabitant*123
9. Gallons per day to each consumer*125
10. Gallons per day to each tap (active)*728
11. Average rate received per million gallons metered....\$83.94
12. Average rate received per million gallons pumped....\$78.62

Year January 1, 1948 through December 31, 1948

13. Cost of supplying water, per million gallons consumed
figured on total maintenance (item CC) less
credits\$61.54
14. Cost of supplying water, per million gallons consumed
figured on total maintenance plus interest on
bonds CC+DD (less credits)\$65.32
15. Total cost of supplying water per million gallons con-
sumed figured on total maintenance, plus in-
terest on bonds and bond payments CC+DD+-
EE (less credits)\$84.07

*Includes population supplied in the towns of Dartmouth and Acushnet.

STATISTICS RELATING TO DISTRIBUTING SYSTEM

MAINS

1. Kind of pipe cast iron and steel.
2. Sizes, from 4 inch to 48 inch.
3. Extended 4,581 feet during the year.
4. Discontinued 749 feet during year.
5. Total now in use 218.292 miles.
6. Cost of ordinary maintenance per mile including flushing and inspecting gates and hydrants \$58.76.
7. Number of leaks per mile .055.
8. Length of pipes less than 4 inches diam. 2.143 miles.
9. Number of hydrants added during the year 6.
10. Number of hydrants public (1944) and private (421) now in use 2,365.
11. Number of stop gates added during year 17.
12. Number of stop gates now in use, 3,009.
13. Number of stop gates smaller than 4 inch, 94.
14. Number of blow offs, 206.
15. Range of pressure on mains, 16 lbs. to 91 lbs.

SERVICES

16. Kind of pipe; lead, cast iron and copper tubing.
17. Sizes, $\frac{1}{2}$ inch to 12 inch.
18. Extended 9,074 feet.
19. Discontinued 323 feet.
20. Total now in use 152.0936 miles.
21. Number of service taps added during year:

New Bedford	200
Dartmouth	108
Acushnet	43
Total added	351
22. Number now laid:

New Bedford	20,301
Dartmouth	2,085
Acushnet	746
Total now laid	23,132
Total now in use in N.B....	18,196
23. Average length of service 39.5 ft.
24. Average cost of service for the year:

(a) Gross	\$82.03
(b) Net	15.18
25. Number of meters to be added 154.
26. Number now in use, New Bedford only 17,891. (See Table T)
27. Percentage of active services, metered 98 $\frac{3}{10}$ %.

CITY ORDINANCE

Shellfish Penalties

CITY OF NEW BEDFORD

In the Year One Thousand Nine Hundred and Forty-Eight

AN ORDINANCE

PROVIDING PENALTIES RELATIVE TO THE TAKING OF SHELLFISH

WHEREAS, the deferred operation of this ordinance would tend in part to defeat its purpose, therefore it is hereby declared to be an emergency ordinance, for the immediate preservation of the public safety, necessity and convenience, due to abnormal conditions existing in connection with the taking of shellfish, including scallops, therefore

BE IT ORDAINED by the city council of the city of New Bedford as follows,—

SECTION 1. Chapter 16 of The Code of the City of New Bedford is hereby amended by inserting a new section which shall be known as Section 38, which shall read as follows,—

Section 38. Shellfish — Penalties.

(a) No person shall take shellfish, including scallops, from the waters of the city of New Bedford until a proper license or permit has been obtained. Any person violating these provisions shall be punished by a fine of \$10.00 for each and every offense.

(b) Whoever wilfully and without lawful authority, by word, act or deed, hinders or interferes with or aids in hindering or interfering with a person lawfully engaged in the process of taking shellfish, including scallops, shall be punished by a fine of \$20.00 in addition to any and all other penalties provided by law.

(c) Any person violating any of the rules and regulations relative to the taking of shellfish and scallops duly enacted by the city council shall be punished by a fine of \$10.00 for each and every offense.

SECTION 2. This ordinance shall take effect in accordance with the provisions of Chapter 43 of the General Laws (Ter. Ed.).

IN CITY COUNCIL, October 14, 1948.

AMENDMENT

To Rules and Regulations

For The Taking of Shellfish

ORDERED, That the rules and regulations for the taking of shellfish adopted by the city council on September 9, 1948 and approved by the mayor on September 10, 1948, be and the same are hereby amended as follows,—

Section 2, Paragraph 13, to read

13. Taking shellfish of any kind, including scallops, under a license or permit shall be between 7 a.m. and 5 p.m.

Section 2, a new paragraph to be numbered 9a.

9a. The shellfish warden is hereby authorized to take the license or permit or any person found by him to be violating these rules and regulations. He shall report to the city council the nature of said violation, and the city council shall take whatever action it deems required by the circumstances. The taking of said license or permit by the shellfish warden shall act as a suspension of all rights and privileges contained in said license or permit, and said suspension shall not be lifted until the matter has been considered by the city council.

A new Section 7a. Penalty.

Any person convicted of the violation of any of these rules and regulations or of any statute relative to the taking, transportation or sale of shellfish, including scallops, shall immediately surrender his permit or license to the shellfish warden who, in turn, shall deposit it with the city clerk. A person so convicted shall be ineligible for a license or permit until the expiration of one year from the date of said conviction.

Adopted by the city council of the City of New Bedford, Massachusetts, October 14, 1948, and approved by the Mayor October 19, 1948.

Published in the New Bedford Standard-Times October 21, 1948.

SECTION 2. By adding the paragraphs set forth below at the end of Section 1, Chapter 15 of the Code of the City of New Bedford,—

“Parking Meter” — The words “Parking Meter” shall mean any mechanical device, not inconsistent with the provisions of this regulation, and placed or erected on any public way within the City for the regulation of parking. Each parking meter installed shall indicate by proper legend the legal parking time established by this ordinance and when operated shall at all times indicate the balance of legal parking time permitted and at the expiration of such period shall indicate illegal or overtime parking.

“Parking Meter Zone” — The words “Parking Meter Zone” shall mean and include any street or portion thereof upon which parking meters are installed and in operation and upon which parking of vehicles is permitted for a limited time subject to compliance with the further provisions of this regulation.

“Parking Meter Space” — The words “Parking Meter Space” shall mean any space within a parking meter zone, adjacent to a parking meter which is duly designated for the parking of a single vehicle by lines painted on the surface of the street adjacent to or adjoining each parking meter.

SECTION 3. Chapter 15 of the Code of the City of New Bedford is hereby amended by adding at the end thereof a new article to be known as Article VIII, which shall read as follows:

ARTICLE VIII — PARKING METERS

Section 47. No person shall park a vehicle for a period of time longer than one hour, between the hours of nine o'clock A.M. and six o'clock P.M. on any of the streets hereinafter designated in this section, or as may hereafter be fixed by ordinance on any day. This restriction shall not apply on Sundays or during the hours of legal holidays during which business establishments are required by law to remain closed.

In accordance with the foregoing, parking meter zones are established in the following streets or parts of streets:

ACUSHNET AVENUE, west side, from Spring Street to Middle Street excepting such areas as are otherwise regulated by ordinance.

PURCHASE STREET, east side, from Spring Street to North Street excepting such areas as are otherwise regulated by ordinance.

PURCHASE STREET, west side, from Spring Street to North Street excepting such areas as are otherwise regulated by ordinance.

PLEASANT STREET, east side, from Spring Street to Kempton Street excepting a loading and unloading area extending from a point 237.4 feet north of the north curb line of Union Street northerly 44 feet, a loading and unloading area extending from the north curb line of Elm Street northerly 38.8 feet, a loading and unloading area extending from a point 83.6 feet north of the north curb line of Middle Street northerly 45 feet and such other areas as are otherwise regulated by ordinance.

PLEASANT STREET, west side, from Spring Street to Kempton Street excepting a loading and unloading area extending from a point 59.8 feet south of the south curb line of Union Street southerly 40 feet and such other areas as are regulated by ordinance.

SIXTH STREET, east side, from Spring Street to Middle Street excepting a loading and unloading area extending from the north curb line of Union Street northerly 64.2 feet and such other areas as are otherwise regulated by ordinance.

SIXTH STREET, west side, from Spring Street to Middle Street excepting from Mechanics Lane to Elm Street and such other areas as are otherwise regulated by ordinance.

FOSTER STREET, east side, from Middle Street to Kempton Street excepting such areas as are otherwise regulated by ordinance.

SPRING STREET, south side, from Acushnet Avenue to Sixth Street excepting such areas as are otherwise regulated by ordinance.

SPRING STREET, north side, from Acushnet Avenue to Sixth Street excepting a loading and unloading area extending from the east curb line of Purchase Street easterly a distance of 42.2 feet and such other areas as are otherwise regulated by ordinance.

UNION STREET, south side, from Acushnet Avenue to Eighth Street excepting a loading and unloading area extending from a point 60 feet east of the east curb line of Seventh Street easterly 44.6 feet and such other areas as are otherwise regulated by ordinance.

UNION STREET, north side, from Acushnet Avenue to Eighth Street excepting a loading and unloading area extending from a point 102.7 feet west of the west curb line of Purchase Street westerly a distance of 43 feet and such other areas as are otherwise regulated by ordinance.

MARKET STREET, south side, from Pleasant Street to Sixth Street excepting such areas as are otherwise regulated by ordinance.

MARKET STREET, north side, from Pleasant Street to Sixth Street excepting such areas as are otherwise regulated by ordinance.

WILLIAM STREET, south side, from Acushnet Avenue to Sixth Street excepting such areas as are otherwise regulated by ordinance.

WILLIAM STREET, north side, from Acushnet Avenue to Sixth Street excepting a loading and unloading area extending from the east curb line of Pleasant Street easterly 66 feet and such other areas as are otherwise regulated by ordinance.

ELM STREET, south side, from Acushnet Avenue to Sixth Street excepting such areas as are otherwise regulated by ordinance.

ELM STREET, north side, from Acushnet Avenue to Sixth Street excepting such areas as are otherwise regulated by ordinance.

MIDDLE STREET, north side, from Acushnet Avenue to Foster Street excepting such areas as are otherwise regulated by ordinance.

HIGH STREET, north side, from Pleasant Street to Foster Street excepting such areas as are otherwise regulated by ordinance.

KEMPTON STREET, north side, from Purchase Street to Foster Street excepting such areas as are otherwise regulated by ordinance.

SECTION 48. There is hereby established the Parking Meter Board of the City of New Bedford, whose members shall consist of the City Clerk, the City Treasurer and the Chief of Police, ex-officio, which board is hereby empowered to contract for the acquisition and installation of parking meters provided for by this ordinance and to maintain said meters in good workable condition.

SECTION 49. The Parking Meter Board of the City of New Bedford is hereby authorized and directed to install parking meters within the areas described in this ordinance or cause the same to be so installed. The meters shall be placed at intervals of not less than 20 feet apart and not less than 12 inches nor more than 24 inches from the face of the curb adjacent to individual meter spaces. Meters shall be so constructed as to display a signal showing legal parking upon the deposit therein of the proper coin or coins of the United States as indicated by instruc-

tions on said meters and for such period of time as is or shall be indicated by ordinance. Said signal shall remain in evidence until expiration of the parking period designated at which time a dropping of a signal automatically or some other mechanical operation shall indicate expiration of said parking period.

SECTION 50. The Chief of Police is hereby authorized and directed to establish parking meter spaces, in such parking meter zones as are herein specified, or as may be hereafter fixed by ordinance, and to indicate the same by white markings upon the surface of the highway.

Nothing contained in this Parking Meter section shall be construed to prohibit the City Council from making provisions for bus stops, taxicab stands, service zones and loading zones as authorized by other sections of this ordinance on any street or portion of street which has been or may hereafter be designated herein as a parking meter zone.

SECTION 51. Whenever any vehicle shall be parked adjacent to a parking meter the owner or operator of said vehicle shall park within the space designated by street marking lines and, upon entering such space shall immediately deposit in said meter the required coin of the United States for the maximum legal parking period both as indicated or shown on the meter and if so required set the mechanism in motion.

The fee for the maximum parking time shall be five (5) cents or one (1) cent for each proportionate period of said maximum limit, as shown on the meter.

(1) It shall be unlawful for any person to deposit or cause to be deposited in a parking meter any coin for the purpose of permitting the vehicle of which he is in charge to remain in a parking space beyond the maximum period of time allowed in a particular zone.

(2) It shall be unlawful for any person to park a vehicle within a parking meter space unless such vehicle is wholly within the painted lines adjacent to such meter.

(3) It shall be unlawful for any unauthorized person to tamper with, break, injure or destroy any parking meter or to deposit or cause to be deposited in such meter any slugs, device of metallic substance or any other substitute for the coins required.

SECTION 52. Operators of commercial vehicles may park in a metered space without depositing a coin for a period not to exceed 30 minutes for purposes of loading or unloading. Parking in excess of this time limit without depositing the proper coin shall be deemed a violation of the provisions of this ordinance.

SECTION 53. The City Treasurer is hereby designated as the person authorized to collect monies deposited in parking meters or to cause the same to be collected. Such monies shall be deposited forthwith with the City Treasurer in a separate account to be known as the City of New Bedford Parking Meter Account.

SECTION 54. All fees received by said City of New Bedford from the operation and use of parking meters shall be used as authorized by Statute 1947, Chapter 442, and the General Laws.

SECTION 55. Paralegics shall be exempt from the provisions of this ordinance.

SECTION 56. It shall be the duty of police officers to enforce the provisions of this section.

SECTION 57. Any person who violates any parking provisions of this ordinance shall be subject to the penalties provided by Chapter 90, Section 20A of the General Laws and any other violations shall be punishable as may be provided by law.

SECTION 58. This ordinance shall take effect upon the date parking meters are placed in operation and shall continue in effect for a period of one year thereafter.

CITY ORDINANCE**Amending Parking Meter Ordinance****CITY OF NEW BEDFORD**

In the Year One Thousand Nine Hundred and Forty-Nine

AN ORDINANCE**PROVIDING FOR 12 MINUTE PARKING ADJACENT TO THE
NEW BEDFORD POST OFFICE**

WHEREAS, the deferred operation of this ordinance would tend in part to defeat its purpose, therefore it is hereby declared to be an emergency ordinance, necessary for the immediate preservation and convenience of the public welfare and the regulation of traffic through the use of parking meters.

Be it ordained by the City Council of the City of New Bedford as follows :—

SECTION 1. That portion of Section 47 of Article VIII as contained in Chapter 15 of The Code of the City of New Bedford establishing a parking meter zone on the west side of Pleasant street is hereby amended by striking out the same in its entirety and by inserting in place thereof the following :

PLEASANT STREET, west side, from Spring street to Elm street, and from Middle street to Kempton street, excepting a loading and unloading area extending from a point 59.8 feet south of the south curb line of Union street southerly 40 feet, and such other areas as are otherwise regulated by ordinance.

SECTION 2. That portion of Section 47 of Article VIII as contained in Chapter 15 of The Code of the City of New Bedford establishing a parking meter zone on the north side of Elm street is hereby amended by striking out the words Sixth street and by inserting in place thereof the words Pleasant street, so that as amended the description will read :

ELM STREET, north side, from Acushnet avenue to Pleasant street, excepting such areas as are otherwise regulated by ordinance.

SECTION 3. Article VIII as contained in Chapter 14 of The Code of the City of New Bedford is hereby amended by adding a new section to be known as Section 47A, which shall read as follows:

SECTION 47A. No person shall park a vehicle for a period of time longer than 12 minutes on any day between the hours of nine o'clock A. M. and six o'clock P. M. on any of the streets hereinafter designated in this section, or as may hereafter be fixed by ordinance. This restriction shall not apply on Sundays or legal holidays.

PLEASANT STREET, west side, from Elm street to Middle street, excepting such areas as are otherwise regulated by ordinance.

ELM STREET, north side, from Pleasant street to Sixth street, excepting such areas as are otherwise regulated by ordinance.

SECTION 4. This ordinance shall be effective as soon as the meters in the area affected have been adjusted, which shall be within a reasonable time after approval by the State Department of Public Works has been received, and shall continue in effect until the expiration of the term of the original ordinance "Establish-Parking Meters in the Streets."

CITY ORDINANCE**Amending Parking Meter Ordinance****CITY OF NEW BEDFORD**

In the Year One Thousand Nine Hundred and Forty-Nine

AN ORDINANCE

Providing for the installation of Parking Meters on KEMPTON STREET, south side, between Purchase and Foster Street.

Be it ordained by the City Council of the City of New Bedford as follows:—

SECTION 1. Section 24(b) of Article V as contained in Chapter 15 of the New Bedford City Code is hereby amended by striking out the following paragraph,—

- (7) KEMPTON STREET, south side, from 74 feet west of the west line of Purchase Street to Pleasant Street.

SECTION 2. An Ordinance Establishing Parking Meters in the Streets Approved by the Department of Public Works of the Commonwealth of Massachusetts, February 28, 1949, as amended is hereby further amended by adding at the end of Section 47 of Article VIII the following new paragraph:—

KEMPTON STREET, south side, from Purchase Street to Foster Street excepting such areas as are otherwise regulated by ordinance.

SECTION 3. This ordinance shall take effect upon the date parking meters are placed in operation in the aforementioned area, which shall be within a reasonable time after approval by the Department of Public Works has been received, and shall continue in effect until the expiration of the term of the original ordinance "Establishing Parking Meters in the Streets".
